profim

Revo represents
a radical rethinking
of the way upholstered
contract furniture
is made in response
to the climate crisis.

Replacing plywood base structure
with REPP (recycled expanded polypropylene)
we maximize the potential reuse
of the base materials.

Pearson Lloyd

Founded in East London in 1997 by Luke Pearson and Tom Lloyd, the design office Pearson Lloyd works with manufacturers, brands and public bodies to identify and build products, spaces and services that respond to the challenges of the day and enhance our experience of the world. Their philosophy of 'Making Design Work' emphasizes the studio's passion for the act of making functional, beautiful and efficient solutions that serve equally the needs of their clients, their users and society.

The product weight
reduced by 40%.

Revo's success as a modular furniture system is down to the fact it is extremely lightweight thanks to replacing the plywood by recycled expanded polypropylene (REPP).

It is 100% recyclable and remouldable.
With no additives such as glass fibre REPP
can be endlessly recasted.

We make products
easy for disassembly.

All Revo components can be separated into their component materials, and returned to the manufacturing cycle. Upholstery is fixed onto the folded REPP using a tethered drawstring, which means no glue or staples are needed, facilitating easy disassembly and second-life of materials.

The collection includes sofas, benches, screens, stools and tables in softly contoured, organic shapes.

Learn more:

Revo brings a consistent design language to every space, whatever its function or size.

96 distinct modular configurations, support different styles of work – from solo to team-based, formal meeting to spontaneous collaboration.

This versatility is in tune with the increasingly differentiated nature of the work experience.

Revo Configuration Guide

Pearson Lloyd

Revo configuration guide.

Revo is designed to bring a consistent design language to every space, whatever its function or size. Create a Your perfect space with a configuration guide.

REVO.

Endlessly configurable, infinitely recyclable.

Designed by Pearson Lloyd, Revo represents a radical rethinking of the way office furniture is made. Responding to the changing way we work and the urgent need for action on climate, our new modular seating collection sets new standards in both sustainability and versatility.

The Revo family includes sofas, tables, screens and pouffes in softly contoured, organic shapes. Each piece in the collection is lightweight and easily manoeuvrable – so when needs change, so does Revo.

Features:

- Circular product – design for easy disassembly. All Revo components can be easily separated into their component materials, and returned to the manufacturing cycle,
- Created from recyclable REPP (recycled expanded polypropylene) instead of wood,
- Manufactured without glue or staples,
- Product weight reduced by 40%,
- Each piece in the collection is lightweight and easily manoeuvrable,
- Every stage of production – manufacture to shipping – is energy- and carbon-conscious,
- The Revo collection range: 2 pouffes, 2 narrow sofas, 3 wide sofas, 3 backrests, 3 screens, 2 laptop tables, 2 coffee tables, 3 conference tables,
- Available in 96 distinct modular configurations.

Revo Product Factsheet

Pearson Lloyd Design

For more than 30 years, we've been creating friendly work environments – no matter how, where, or with whom you work.

Our refined, technologically advanced, ergonomic seats support people in their daily work.

With our large-scale production, we feel a responsibility for the global ecosystem.

In mass production, every small change is multiplied by thousands of products, which is why we are changing old habits and adapting new norms of circular economy.

– We're radically reducing the use of primary raw materials by replacing them with those recovered from waste. In addition, we're reducing our own production waste.

– We design durable products which last for years and construct them in such a way as to ensure easy recycling.

Step by step, we're closing the cycle of circular production. We are committed

to making our sustainable solutions affordable, so that they can reach many users.

Revo collection

REVO. Endlessly configurable, infinitely recyclable.

Designed by Pearson Lloyd, Revo represents a radical rethinking of the way office furniture is made. Responding to the changing way we work and the urgent need for action on climate, our new modular seating collection sets new standards in both sustainability and versatility.

The Revo family includes sofas, benches, screens, pouffes and tables in softly contoured, organic shapes. By arranging these elements in different ways, Revo can be configured to suit every workspace, whatever its function or size.

Features:

- Circular product – design for easy disassembly. All Revo components can be easily separated into their component materials, and returned to the manufacturing cycle
- Created from recyclable REPP (recycled expanded polypropylene) instead of wood
- Manufactured without glue or staples
- Product weight reduced by 40%
- Each piece in the collection is lightweight and easily manoeuvrable
- Every stage of production – manufacture to shipping – is energy- and carbon-conscious
- The Revo collection range: 2 pouffes, 2 narrow sofas, 3 wide sofas, 3 backrests, 3 screens, 2 laptop tables, 2 coffee tables, 3 conference tables
- Available in 96 distinct modular configurations.

Quality

Profim provides a 5-year warranty for products used 8 hours a day, 5 days a week (single shift operation).

Certificates

www.blauer-engel.de/uz117

Technical data

Seat elements / pouffes:

- Construction: top is made of REPP* material (recycled expanded polypropylene) with moulded foam, fully upholstered. Bottom of the seat made of plywood.
- Foam density 70 kg/m³.
- Seat can be equipped with mediaport - option.

Backrest elements:

- Construction: REPP* material (recycled expanded polypropylene) with moulded foam, equipped with metal elements enabling mounting it to the seats.
- Foam density 65 kg/m³.

Partition wall

- Construction: plywood + HDF board + cardboard honeycomb. Fully upholstered with fabric.
- Partition walls can not appear as a free standing elements.

Glides:

- Teflon - universal (standard).

* Recycled expanded polypropylene (REPP) is a highly versatile closed-cell bead foam that provides a unique range of properties, including outstanding energy absorption, multiple impact resistance, thermal insulation, buoyancy, water and chemical resistance, exceptionally high strength to weight ratio and 100% recyclability.
