Introducing the 4T system

BY HEE WELLING

Introducing the 4T system

BY HEE WELLING

Enriching the experience of modern work

Icons is a furniture manufacturer with a mission: to enrich peoples' lives at work.

Over the past decade, we have worked with new and established designers from an array of different disciplines, all with the ambition to create furniture that is inviting, functional and builds an emotional connection with its users.

Our range of products is based on creating solutions to common interior design challenges, designing furniture for modern work. We address the need for furniture that doesn't compromise on function and quality.

All our products are made in Denmark with the aim of supporting the local economy of our origins. We find that producing our furniture in Denmark keeps us close to the source, allowing for immense flexibility of finishes and sizes and being able to provide answers quickly and efficiently to our clients.

For more information on any of the products in this catalogue, please contact your dedicated sales representative.

We manufacture our furniture in
Denmark within our production
workshops based in Horsens and
Aarhus, staying true to our Danish
roots and supporting the local
economy.

Star of the show, or your behind-the-scenes support

The 4T System is a scalable kit of parts offering limitless opportunities to zone space, provide privacy without isolation and encourage idea-sharing through adaptable configurations.

The structure can be built out of a selection of components that can be reconfigured and worked with to create a number of possible solutions.

Whether the space requires room division, more seating options or creative work boards, the 4T system provides a fully integrated creative solution.

The 4T was named after the type of connective material used for the product.

‘T-Iron’ is a rod with a short cross piece which is used as to connect two structures, with the particular width of the T-Iron used in 4T measured at 40mm.

Wall or ceiling mounted to freestanding and mobile: 4T is flexible and can be adapted considering your unique workplace requirements.

The 4T is a scaleable kit of parts designed to divide space, responding with functional configurations that support the needs of modern work

The 4T System, Wall Division

FLEX APPEAL

THE 4T SYSTEM

DISPLAY

Display screen solutions using savvy shelving for showcasing small items, wall or ceiling mounted

FOCUS

Informal meeting zones supported seamlessly by integrating Icons' Bank sofa

ZONE

Increase unique spaces without compromising on future flexibility

FLEX APPEAL

THE 4T SYSTEM

PRESENT

Surfaces combined with shelving within small meeting areas aid creative collaboration on the fly

FILTER

Planters for added biophilia, sound absorption and subtle privacy for zoned areas or wall accents

MOVE

Mobile and responsive, the 4T system can help you work through your day, wherever you may end up

FLEX APPEAL

THE 4T SYSTEM

PIN

Surfaces comprising of fabric and pinnable materials aid brainstorming, be it on a built partition or mobile frame

WRITE

Writeable surfaces for mobile boards or as panels built into wall divisions support the demands of creative teams

SCREEN

Frosted or reeded plexi-glass, or metal panels, can be used in all configurations to help with gentle, or more robust privacy

The 4T system supports the
creation of informal meeting
zones, integrating seamlessly with
Icons of Denmark's Bank sofa

With three widths and three heights, there
are plentiful methods for approaching how
the 4T booth is incorporated into workplace
environments, be it within an office area for added
personal focus or a break-out, restaurant space.

The 4T System and Bank sofa

Hee Welling, designer of the 4T System

“With the 4T system, you can
create endless possibilities, be it
for an office or break-out space.
It is just a matter of playing
around with it.”

— Hee Welling

Hee Welling is an award-winning designer
based in Copenhagen. His philosophy is
expressed in the simple geometries and
spirited contours of his products.

Materiality and tactility

The sky is the limit when it comes to selecting materials for the 4T system.

Aside from the robust powder coated iron frame, which can be produced in various colour options, the wider material range is considerate of providing aesthetic freedom and flex of use.

Frosted or reeded plexiglass helps ricochet light in zoned areas, yet still provides gentle privacy.

In addition to metal, lacquered oak veneer panels can be incorporated for a softer, airy feel when used for division. The choice of whiteboard, fabric or bulletin surfaces for panels also suit the range of activities an energetic workplace demands.

The 4T system is limitless in what it can offer, supporting the rapidly changing modern office environment, and the solution to complex workplace challenges

Flexible collaboration with mobile whiteboard or pinnable surfaces

Mobile and responsive, the 4T helps you work through your day
