Ronan & Erwan Bouroullec

Profile:

Ronan Bouroullec (born in 1971) and Erwan Bouroullec (born in 1976) have been working together for more than twenty years now. Their collaboration is a permanent dialogue, nourished by their distinct personalities and a shared notion of diligence, with the intention to achieve greater balance and refinement.

In 1997, they presented their Disintegrated Kitchen at the Salon du Meuble in Paris, where it was spotted by Giulio Cappellini, who gave them their first industrial design commissions. The Bouroullecs have been working with Magis since 2004, designing three complete furniture collections – Striped, Steelwood and Officina – as well as additional projects such as Pila chair, Pilo table, Central and Tambour tables. These days, Ronan and Erwan Bouroullec design for numerous manufacturers, including Magis, Vitra, Kvadrat, Kartell, Established and Sons, Ligne Roset, Axor, Alessi, Issey Miyake, Cappellini, Mattiazzi, Flos, Mutina,

Hay and more recently Glas Italia and Iittala. They also continue to carry out their own experimental activity which is essential to the development of their work at Galerie Kreo, Paris, where four exhibitions of their designs were held between 2001 and 2012. They also embark on occasional architectural projects.

Voted Designers of the Year at the Salon du Meuble in 2002, their other awards include the Compasso d'Oro won in 2011 for the Steelwood chair they designed for Magis.

Several exhibitions have been devoted to their work.

In 2012, Phaidon Press published *Works*, a comprehensive monographic book about Ronan and Erwan Bouroullec. Previously, two other monographs had been published about the Bouroullec brothers' design work: *Ronan et Erwan Bouroullec – Catalogue de Raison* (Paris: Images Modernes / Kreo, 2002) and *Ronan et Erwan Bouroullec* (Paris: Phaidon Press, 2003).

Design and

Designed by Ronan & Erwan Bouroullec, the Steelwood collection is the combination between two traditional materials, wood and steel plate, which together create simple yet elegant and sophisticated design products. The first product produced was the Steelwood Chair, but today the family includes also stools, tables, a modular book-case and a coat hanger.

The combination of the two materials is not new, but still innovative. The structural framework of all Steelwood products is formed by steel plate painted in polyester powder, while the supporting function is given by wooden elements. The respective role of the components is visible and results in a coherent overall picture.

The Bouroullecs consider their Steelwood Chair “stable and democratic, universal and long-lasting.” Its silhouette makes it an easy chair, adaptable to any place from contract spaces to cosy homes. The use of solid materials and modern technologies associated with an artisan component lead to a quality and sustainable product. Thanks to these features, this chair obtained the prestigious Compasso d’Oro Award in 2011.

The particularity and complexity of this chair is given by the backrest that is a veritable technical gem: its curved form is achieved through a process involving nine different phases: the steel plate is perforated and bent, alternating industrial technology with artisanal attention to detail. The final step is the painting in polyester powder. We can say that high-tech industrial processes alternate with artisanal ones.

The Steelwood collection combines traditional shapes, solid materials and modern technology in a contemporary product of exceptional quality.

Engineering

“The Steelwood
chair is stable
and democratic,

universal and
long-lasting.”

Product

Information

STEELWOOD CHAIR

Chair with arms. Legs and seat in solid beech, natural or painted or stained, or in solid American walnut natural, or in solid oak, natural or stained. Frame in steel plate painted in polyester powder. Complete with felt pads.

Chair with arms and seat upholstered. Legs in solid beech, painted. Frame in steel plate painted in polyester powder. Seat in plywood padded in expanded polyurethane foam, fireproof (CLASS 1IM) covered in fabric (Kvadrat, "Divina 3 and Divina MD"). Complete with felt pads.

Compasso d'oro 2011

STEELWOOD STOOL

Legs in solid beech, natural or painted or stained, or in solid American walnut natural or in solid oak, natural or stained. Seat and foot-rest in steel plate painted in polyester powder. Complete with felt pads. Seat cushion available.

STEELWOOD TABLE

Frame (legs and crosspieces) in solid beech, natural or painted. Joints in steel plate painted in polyester powder. Top in HPL.

STEELWOOD SHELVING SYSTEM

Frame (uprights and crosspieces) in solid beech, natural or painted. Joints in steel plate painted in polyester powder. Shelves in painted MDF.

STEELWOOD COAT STAND

Frame in solid beech, natural or painted or in solid American walnut. Joints in steel plate painted in polyester powder.

PRODUCT CARE

We recommend using a soft, either dry or wet, rag. When needed, use ph-balanced soap diluted in water and ph-balanced liquid soap especially formulated for wood, diluted in water. Do not use abrasive sponges as they may leave scratches. Avoid using acidic products, solvents and products containing ammonia. Avoid exposure to sunlight. Periodic and correct maintenance allow the product to keep its original aspect and lengthen the duration of its performance.

WARNING

Do not use different cleaning products from the ones mentioned above. Do not use the product in an improper way. Do not place hot objects on it, sit on the back and/or on the arms, stand on it or use the product as a ladder. Once disused, please make sure this product is disposed in an environment-friendly way.
