Volume IV

De Vorm gives shape to necessities.

Established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually create the opportunity to give them a new life.

A good product makes life easier; it helps us function better throughout the day. You won't think about it after the placement, as it instantly contributes to the pleasant experience – both functionally and aesthetically. For us, a good product is not only well constructed and of excellent quality, but also understood without thought, used without any hesitation and comfortable for years.

Looks matter, but function comes first. We firmly believe that the beauty of a design lies in the sum of functions that makes it complete, understandable and useful. Our products harmonise with the rest of the interior as a steady and trustworthy part of a whole.

Dedicated to process and quality

As a Dutch company rooted in the European design mentality, we are straightforward and honest. That goes for our designs, but also for the way we work. Collaborating with the best in our industry and staying ahead of new developments, we are able to offer high-quality, fully customisable products at a fair price.

From the very first sketches, we combine new techniques with forward-looking materials. Our design process is infused with technical development; innovation results in aesthetic features and the other way around. The outcome is an honest product that meets the standards of today and remains relevant over years.

We continuously raise the bar

Creating a long-lasting value goes beyond the paths we already know. It begins with an enduring aesthetic and requires superior quality to stand a test of time. From strength to impact resistance, we set the highest standards for our products to ensure they are made to last. Extensive testing and thorough material choice are at the core of our design and manufacturing processes.

To offer superior comfort at the minimal expense of future generations, we are always looking at where visual appeal and durability intersect. This counts for every part of a final product, all the way to the packaging. By choosing forward-looking materials and unconventional production techniques, we commit to minimise waste in every way possible.

As the smart forerunner in responsible production techniques, we were among the first in the furniture industry to embrace the possibilities that PET Felt has to offer. With this versatile material, we turn plastic waste into unique and durable furniture items.

Make it blend in or stand out

We set the framework so that you can let your imagination run free. We offer endless customisability within that framework. Whether you want to blend in or stand out, we provide you with the tools.

Respecting the individual character of spaces, we create design pieces with personal freedom. Every item of our collection can be tailored to the aesthetic and functional needs of your interior. From colours to materials, the options are there to make it your own.

220-221 Product overview

222-225 Specifications

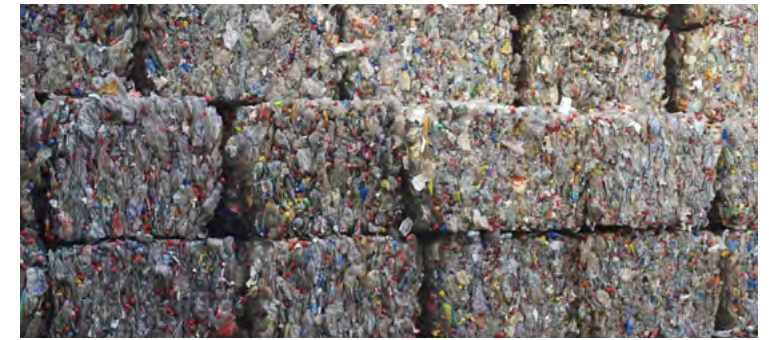

From bottle to chair

To bring a second life to plastic bottles, we collaborate with the local recycling centres. PET Felt technology allows us to utilise plastic waste in interior design, turning it into a versatile and durable material. Let's take a closer look at a journey it takes for plastic bottles to become unique furniture items.

In our design and production processes, we are always looking at where environmental thinking and economic improvement intersect — resulting in minimal waste in every aspect. This vision is emphasized by the way we utilise PET Technology in our collection. PET Felt is a sustainable and versatile alternative to traditional furniture materials offering the highest product quality and user comfort.

Step 1 — Plastic waste

Bottles arrive to the recycling centres in 250kg densely pressed bales, that are teased apart, cleaned and sorted. The sorting machine removes all coloured parts, such as caps and labels.

Step 2 — Flakes

Once the bottles are sorted, they move into the granulator. Inside, large rotating blades shred the bottles into 1 cm flakes. Meanwhile, the granulator removes all remaining debris. What were once plastic bottles are now pure PET flakes, ready for the next phase of their transformation.

Step 3 — Fibre

Further, the PET flakes travel through an extruder, melting them and forming polyester fibres. As a result, hard plastic gets a soft wool-like texture. The fibres are then cut into thin sheets to prepare them for felting.

Step 4 — Felt sheets

The felting machine folds the fibre in layers and compresses it. Then, the actual felting begins – thousands of barb needles stab the material, turning it into felt. Following the same principle, three sheets of felt are merged together into a dense mat, ready for pressing.

Step 5 — Chair

PET Felt can take literally any shape. In a single moulding action, the 3D pressing machine turns a sheet of felt into a sturdy form, preserving its soft wool-like texture. Following this method, PET Felt can be used to produce chair seats, wall panels, lampshades and more.

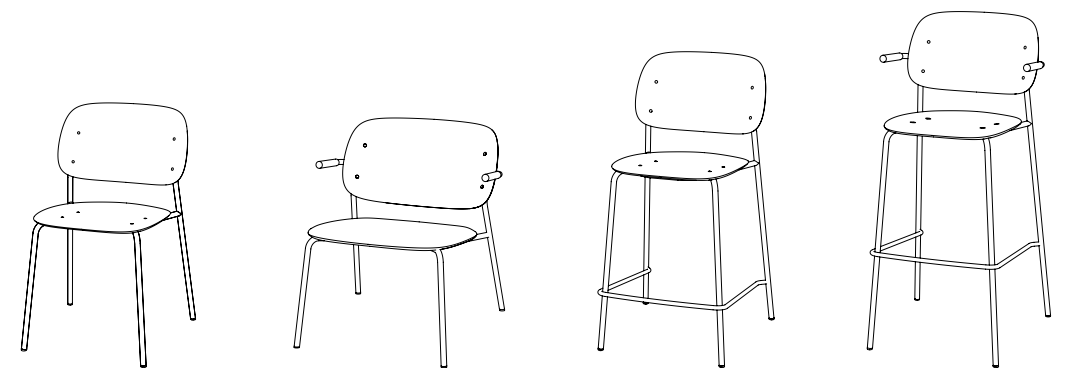

Chairs + Stools

20 — 33	Hale Series
34 — 45	LJ Series
46 — 51	Pod PET Felt Privacy Chair
52 — 57	Nook PET Felt Lounge Chair
58 — 63	Wood Me Series
66 — 69	Clip Chair Solid Ash Wood
70 — 73	Daddy’s Chair Lounge Chair
74 — 81	Twist Series

Hale Series

Designer
Ivan Kasner + De Vorm

Hale was inspired by a classic school chair – simple, functional, no-nonsense. Made from PET Felt, the seat and backrest have a soft texture and gently curved shape granting outstanding comfort. Combined with a slender steel frame, few elements grant Hale its clean expression yet surprisingly extensive functionality. This series of chairs is easily stackable and fully customisable in colours and materials, making it suitable for various interior settings.

"Hale is the first PET Felt product with a double curvature. The seat and backrest have thicker edges and recesses for the frame. These edges give a good grip for lifting and stacking the chairs. We really pushed the process and material to a new level. Now we have an ultimate balance between a slender look and a sturdy chair."

– Ivan Kasner, designer

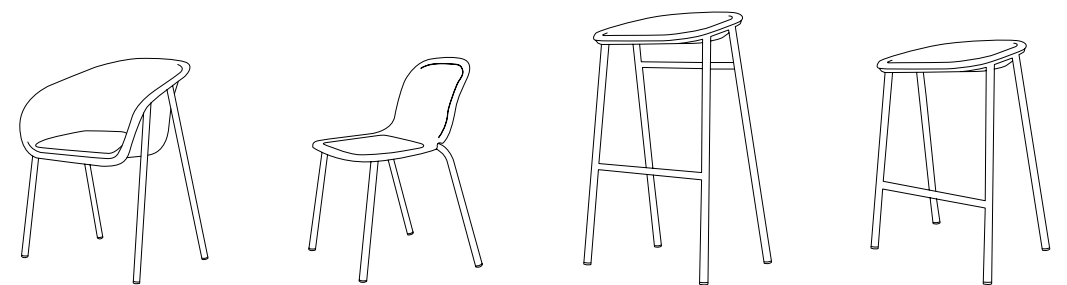

LJ Series

Designer
Laurens van Wieringen

The LJ series consists of four chairs and stools, each with its own function. The curvilinear PET Felt seat and straightforward bent metal frame result in a design that is both functional and aesthetic. The chairs provide an ergonomically curved seat and back support for outstanding comfort. Designed to be fully customisable, LJ series allows you to create a perfectly matching seating for any space and need.

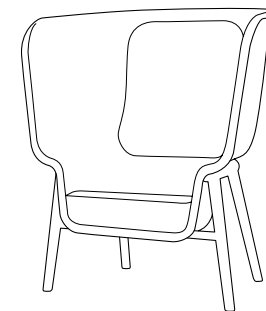

Pod PET Felt Privacy Chair

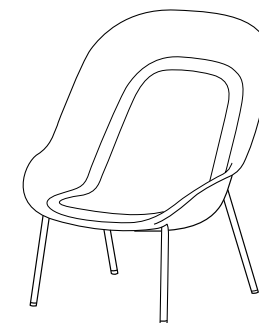

Designer
Benjamin Hubert

Designed with privacy in mind, Pod chair grants a sense of seclusion combined with extensive seating comfort. The embracing PET Felt shell has a pleasant soft texture and a subtle sound-dampening effect. Combined with an elegant ash frame and two upholstered cushions, they create a unique expression making the chair a true eye-catcher. Pod solves privacy issues in breakout areas, hotel lobbies and lounge zones. It comes in eleven unique PET Felt blends with many options for frame colour and upholstery.

Nook PET Felt Lounge Chair

Designed by
Johan van Hengel

Nook is a generous lounge chair that embraces the need for privacy within social settings. Its distinctive shape is determined by a PET Felt shell granting the chair its soft and inviting expression. An insert in the shell accommodates an upholstered cushion for a superior level of comfort. Enveloping the shell from the rear is a slender steel frame that holds everything in place, outlining the chair's original form. Nook is suitable for hotel lobbies, lounge zones and waiting rooms. Choose from eleven PET Felt blends and numerous options for frame and upholstery.

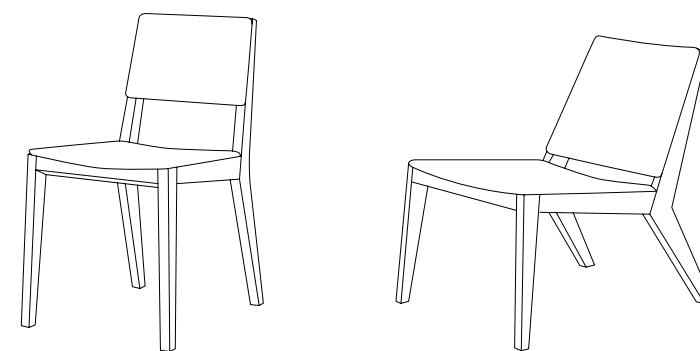

"Nook's distinctive shape is determined by a dramatic pressed-felt shell that gives the chair its inviting personality and aesthetic. The seat's fluid back- and armrests arise organically from the shell's structure, providing shelter and support, while generous proportions invoke a sense of privacy and protection."

– Johan van Hengel, designer

Wood Me Series

Designed by
De Vorm

Wood Me series consists of two refined designs referencing the traditional wooden seating. The chairs feature a solid oak frame and a gently curved spine for long-lasting comfort. With its honest functionality and many bespoke options, Wood Me will become a timeless companion for any interior.

Wood work

Our wooden furniture is manufactured with great care and craftsmanship. To produce the chairs from our collection, a fine blend of craftsmanship and modern technology is required.

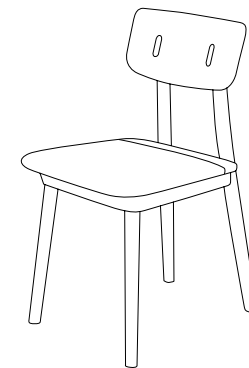

Safe work environments

We only work with the highest quality wood facilities that are closeby. Not only are we able to keep transport emissions low, it also results in West-European quality products made by schooled professionals in safe work environments.

Clip Chair

Solid Ash Wood

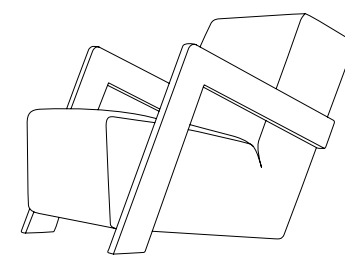

Designed by
Sebastian Herkner

Clip chair features a classic, detail-oriented expression and contrasting materials. The idea behind the 'Clip' is the colouring of attachment between the backrest and the frame, standing in direct contrast to the wooden elements. Made of solid high-quality ash, the chair brings a new perspective on traditional woodwork and craftsmanship. Fully customisable in colours and materials, it adds a playful accent to any dining or meeting setting.

Daddy's Chair Lounge Chair

Designed by
De Vorm

Daddy's Chair offers the ultimate seating comfort and a timeless expression. The fully upholstered seat is supported by wooden armrests that merge into the front legs. Clean geometric lines and distinctive design make this chair a robust icon. Daddy's Chair serves equally well in large, open-plan lobbies and intimate lounge or hospitality settings. Many bespoke options are available for armrests and seat upholstery.

Twist Series

Designed by
De Vorm

With its no-nonsense functionality and versatile appearance, Twist stools meet the needs for occasional seating in social spaces. The tubular steel frame adds a notion of lightness, while the subtle curvature of the PET Felt seat offers proper seating comfort. Thanks to their light weight and double-sided grip, the stools can be stacked when extra space is needed, and easily moved around to adjust the setting to your needs.

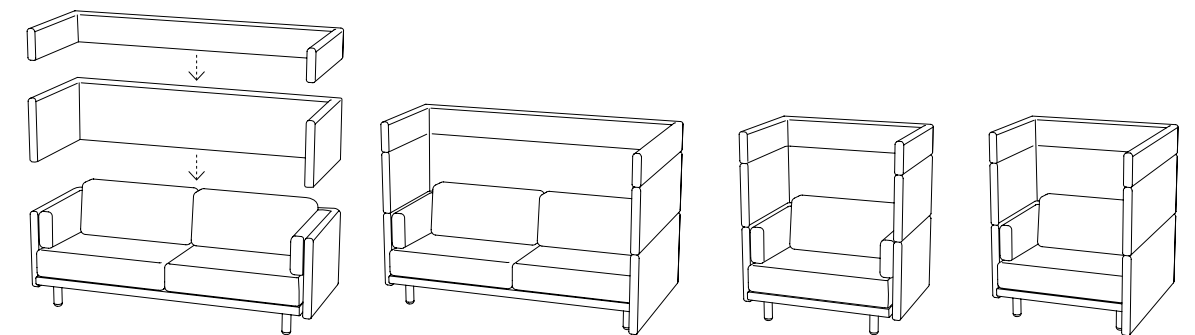

Couches

84 — 89	Arnhem Series
90 — 95	Upside Down Series
96 — 99	Florian Series

Arnhem Series

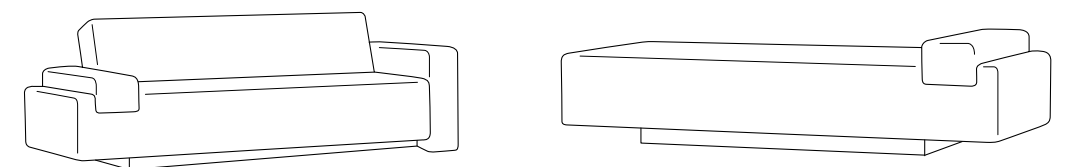

Designed by
Sebastian Herkner

Arnhem series serves various aesthetic and spatial needs, ranging from an inviting lounge couch to a privacy pod. This family of couches features a fully upholstered modular body and reversible cushions, available in a wide range of fabrics. Putting two high-back sofas together creates an intimate meeting spot for extensive privacy and comfort in any workplace, lounge or hospitality setting.

Upside Down Series

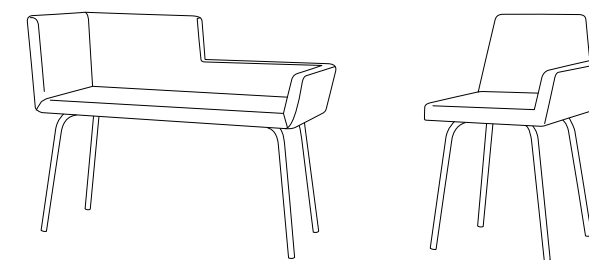

Designed by
De Vorm

Upside Down owes the name to its functional feature, a rotatable armrest. Turn the armrest upside down to use it as a side table. The series consists of a couch and an island, that can be used alone or as a duo. The elegant design and clean lines make Upside Down suitable for any lounge context.

Florian Series

Designed by
Laurens van Wieringen

Consisting of a bench and a chair, Florian series was first designed for the Florian Bar in Arnhem, the Netherlands. Following its original purpose, the duo was made to fit any hospitality interior. The fully upholstered embracing body is supported by a slender tubular frame, granting the series its elegant geometric expression and long-lasting comfort.

Tables

102 — 109	Big Series
110 — 113	Lite Series
128 — 137	MG Series
138 — 143	Column Series
144 — 147	Hale Table
148 — 151	Musette Series

Big Series

Designed by
De Vorm

One system, endless design possibilities. Big series can be configured to the exact needs of your space. Thanks to its smart modular frame, this table system comes in three standard heights and can take extensive sizes with a minimum amount of legs. Make it as large as you want, choose your own finishes and customise the tabletop shape to match any context.

Lite Series

Designed by
De Vorm

Ultimate customisability of the Lite series allows you to create a perfect table for any need. A lightweight version of the Big table, its modular system is optimised for smaller sizes offering just as many design possibilities. Choose your own height, dimensions, tabletop shape and finishes.

Interior Personalities with AK Series

At De Vorm, we are convinced that interior is personal. With limitless customisability of our collection, we strive to set the framework where the same ingredients can merge into the most contrasting expressions. We would like to invite you inside the extraordinary interior worlds belonging to unique and varied archetypes. Personalities to be inspired by and to relate to. Connect with each of them to create your own perfect mix for any interior project.

Convinced that less is more, Minimalist longs for simplicity and lack of clutter. For them, beauty is simple; it lies in clean lines, neutral shades and pure functionality. Decoration is redundant, the essence is what truly matters. Minimalists know what they can do without, carefully selecting unique, crafted pieces that will serve a lifetime.

Originator dares to be different. Choosing to stand out over blending in, they know how to make a statement with everything they offer to the world. Inspired by futuristic concepts and pure innovations, Originators express themselves through intense colours, quirky shapes and fluorescent elements. Their personal space is a work of art itself.

A devoted art lover, Visionary sees the world through a prism of aesthetics. The design classics of cubism and De Stijl trigger their imagination, which they masterfully express through geometric shapes and primary colours. Bringing a fresh perspective to the time-honoured creations, Visionary sees beauty in timeless, rather than trendy.

Thoughtful masters of their own reality, Philosophers fill it with meaning and wonder. In a constant search for knowledge and inspiration, they often resort to the world of literature, music and art. At times melancholic, Philosopher feels comfortable in dark, deep tones and warm colours. They experience the space through senses, longing for fluidity in textures, materials and patterns.

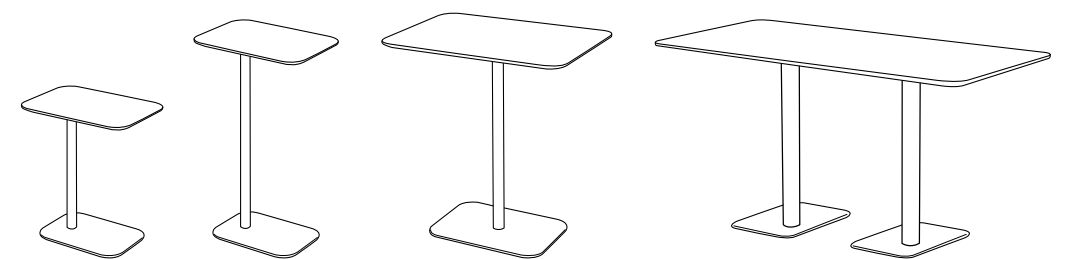

Form always equals function if it's up to Geometrist. Well-organised and tasteful to the roots of their being, they find satisfaction in forever-chic design pieces. Their living space follows the best traditions of mid-century modern design, combining the lounge vibe with deep, earthy tones. Dedicated to comfort, Geometrist leaves room for both tradition and novelty in their interior choices.

Vitalist finds joy in a life far from the burden of consumption. Aware of their impact on the world, they make sensible choices to minimise the footprint. Vitalist enjoys greenery and finds time to reconnect with nature despite the fast-paced lifestyle. They value serenity and bring it to the surroundings through biophilic design and natural materials.

MG Series

Designed by
De Vorm

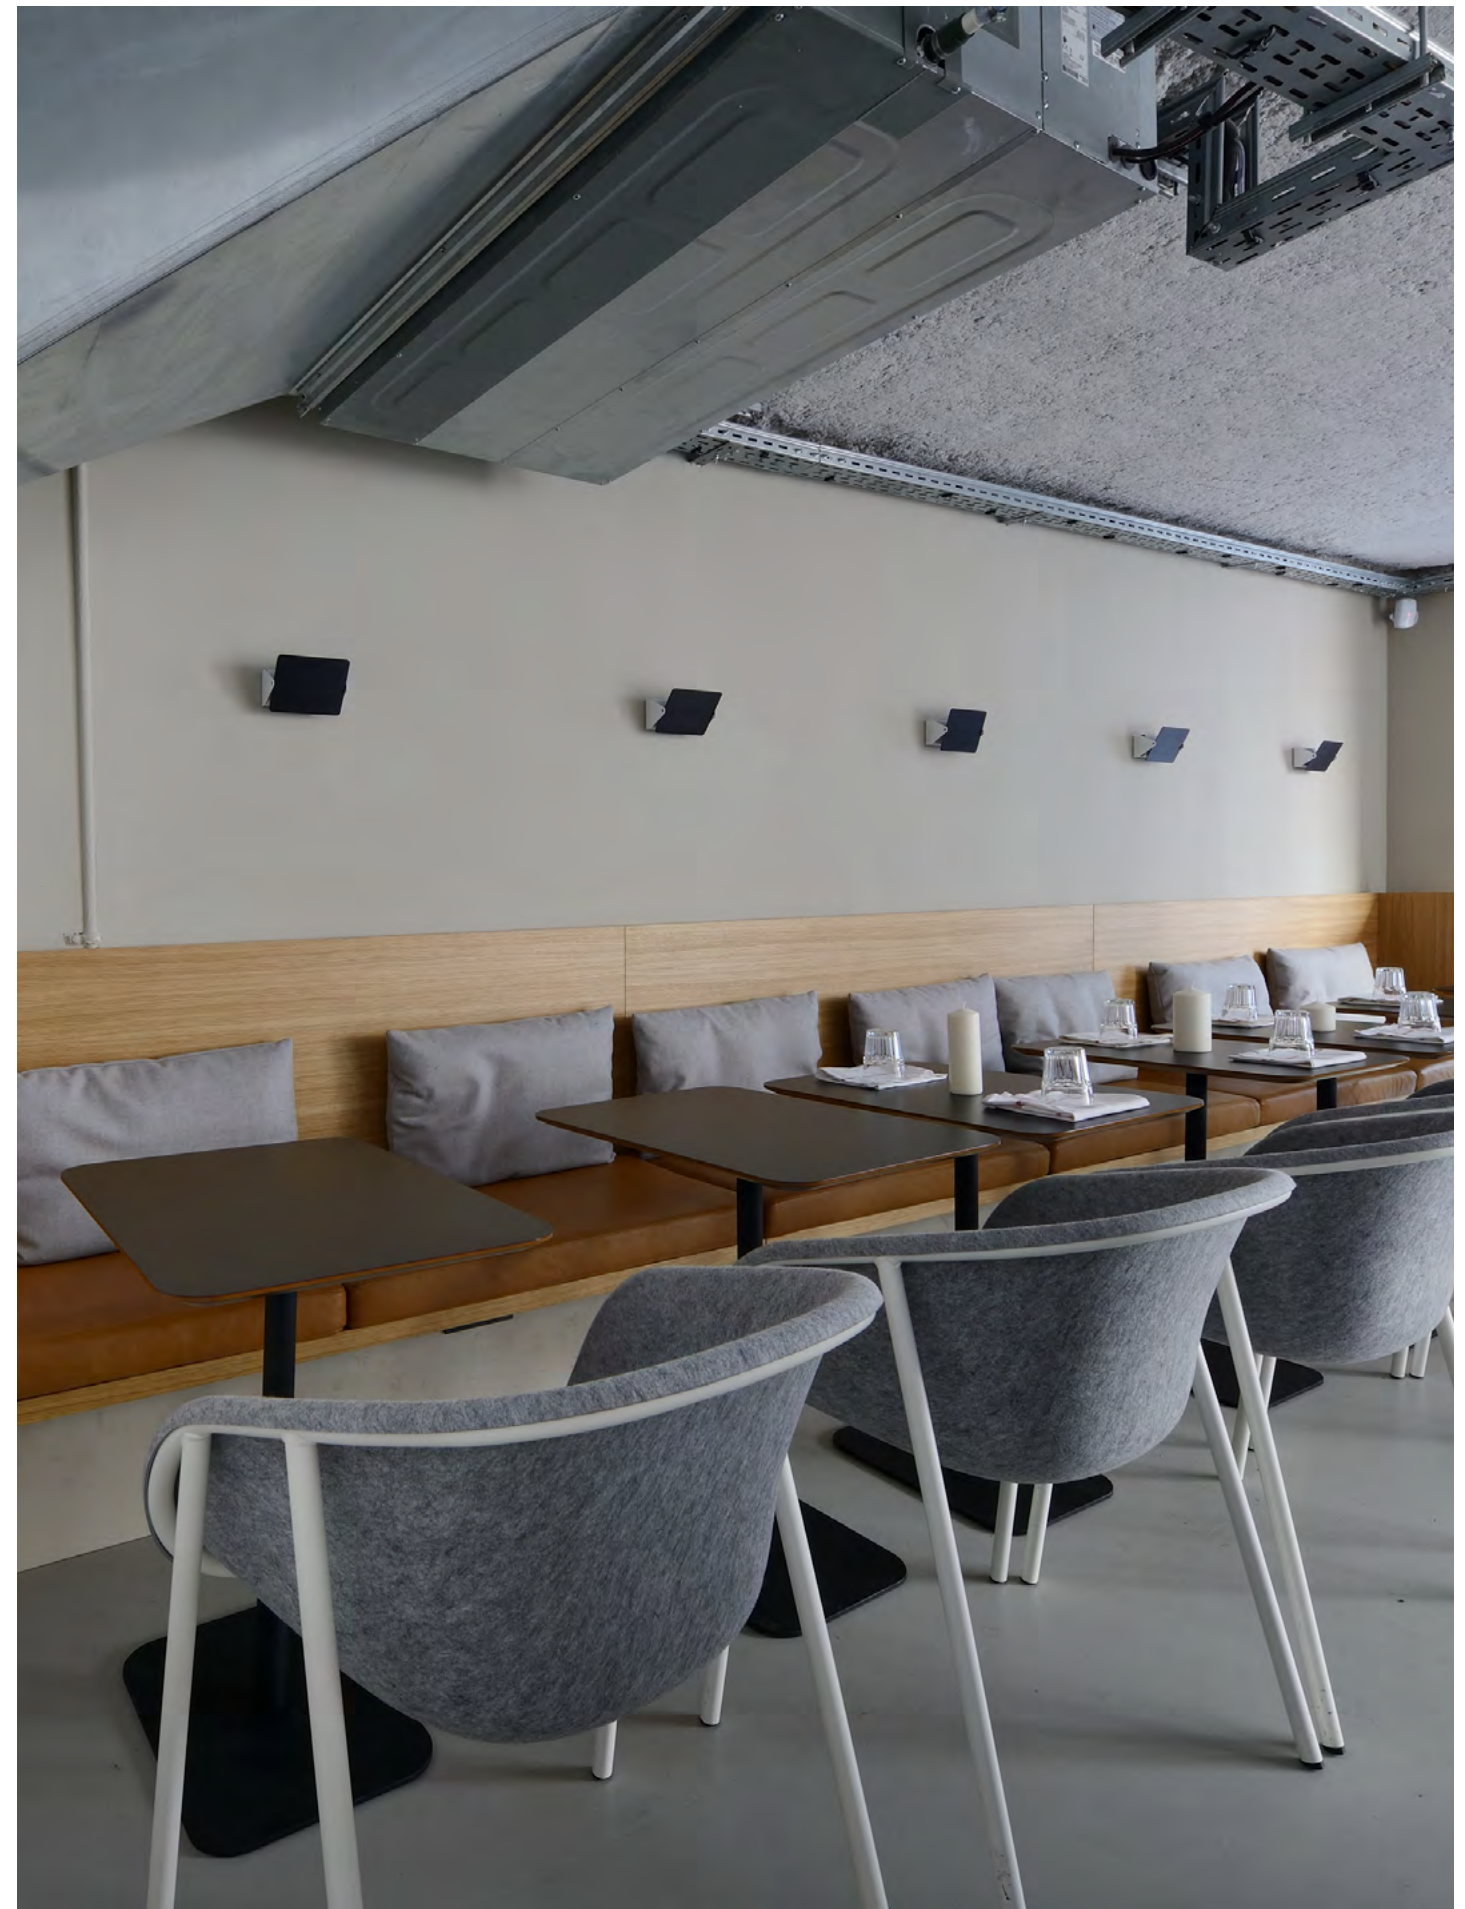

MG series consists of four functional tables that have a clean and modest appearance. Three tables with distinction in size – and therefore in function. The squared tabletop made from high-quality wood veneer has a soft appearance due to the rounded corners, whilst the powder-coated steel frame gives the side table a robust touch. The tables can be used in various settings such as offices, restaurants and bars.

"We were extremely excited when we discovered De Vorm. The simple no-nonsense design with its clear and defined lines made from recyclable materials felt almost too good to be true. It goes very much in tune with our way of thinking and designing."

– Anki Linde, LSL Architects

Column Series

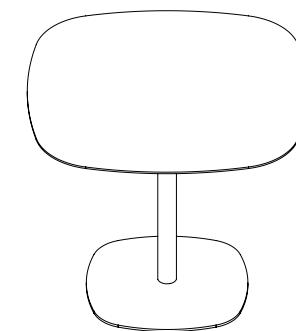

Designed by
De Vorm

Column series offers functional tables with a clean and modest appearance. The tables owe their name to the column base, supporting the gentle round tabletop. From a small side table to an inviting dining table – the choice is there to meet the needs of any interior.

Hale Table

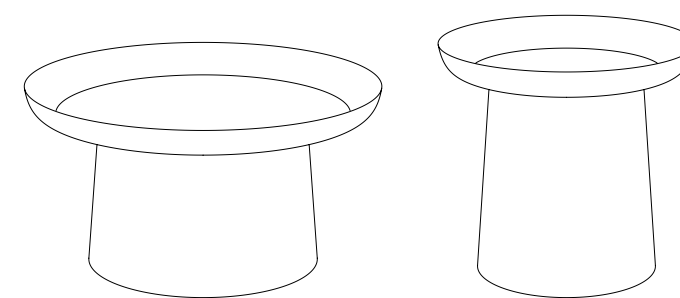

Designed by
De Vorm

Hale Table references the distinctive look of the Hale series through its no-nonsense design and subtle details. The softly rounded tabletop is supported by an elegant column base, creating an inviting setting and a sense of equality. Suitable for both large and intimate spaces, this versatile table will serve equally well in any dining or meeting area.

Musette Side Tables

Designed by
Ionna Vautrin

The distinctive shape of Musette refers to oriental tables used during tea ceremonies. The table is composed of a conical base and a generous circular tray. Available in two sizes and customisable in any RAL colour, it fits prominently into various environments. Musette can be used alone or as a duo in lounge settings, hotel lobbies and breakout areas.

Acoustics

154 — 167

168 — 177

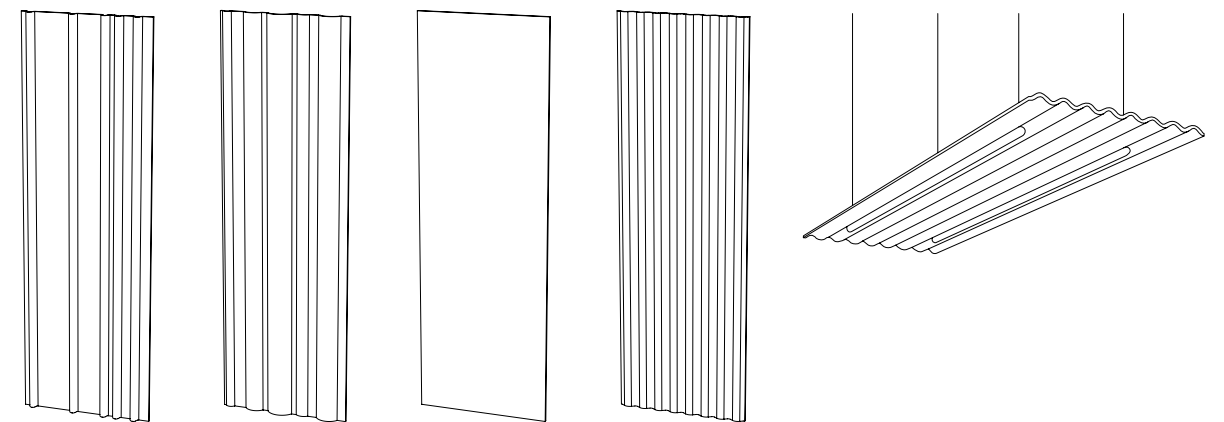

178 — 181

Mute Series

AK Series

Onde PET Felt Acoustic Panel

Mute Series

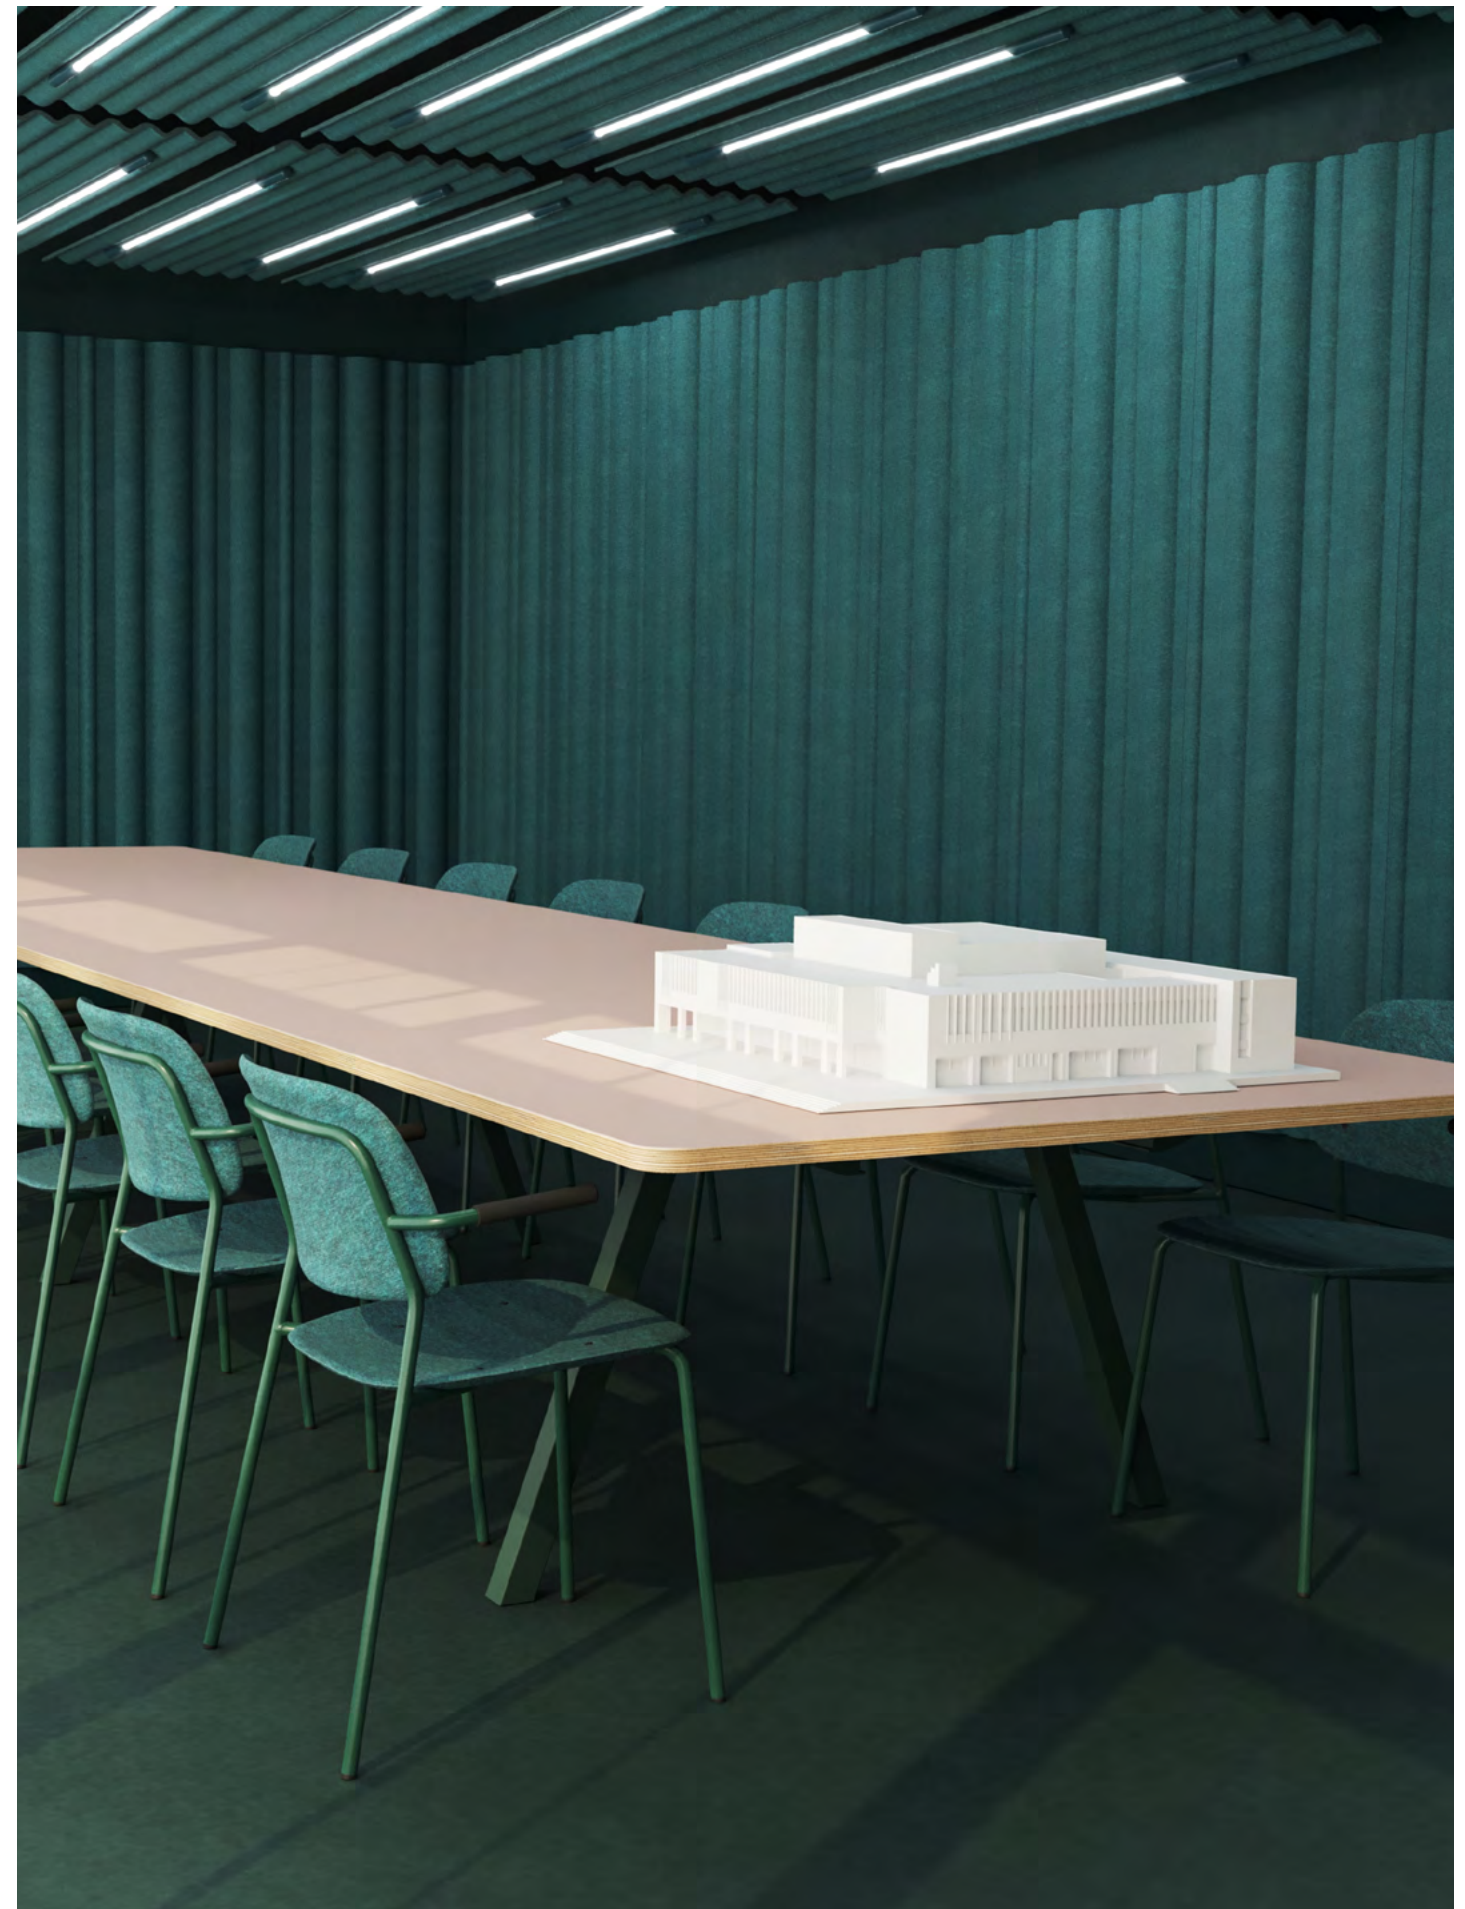

Designed by
De Vorm

Pleasing to the eyes and comfortable to the ears. Mute series offers versatile acoustic solutions for any place and need. Made from PET Felt, the family ranges from wall panels to room dividers, offering a distinctive soft texture and many design options. Functional and aesthetic, Mute series will solve acoustic issues without compromising the looks of your interior.

"We designed an algorithm with the optimal widths of the curves and the flat areas to make it possible to cut out any piece of the panel and always have a flat part at the start and at the end. This way, we made sure that Mute Fit will fit any wall, just like a curtain does."

– De Vorm Design Team

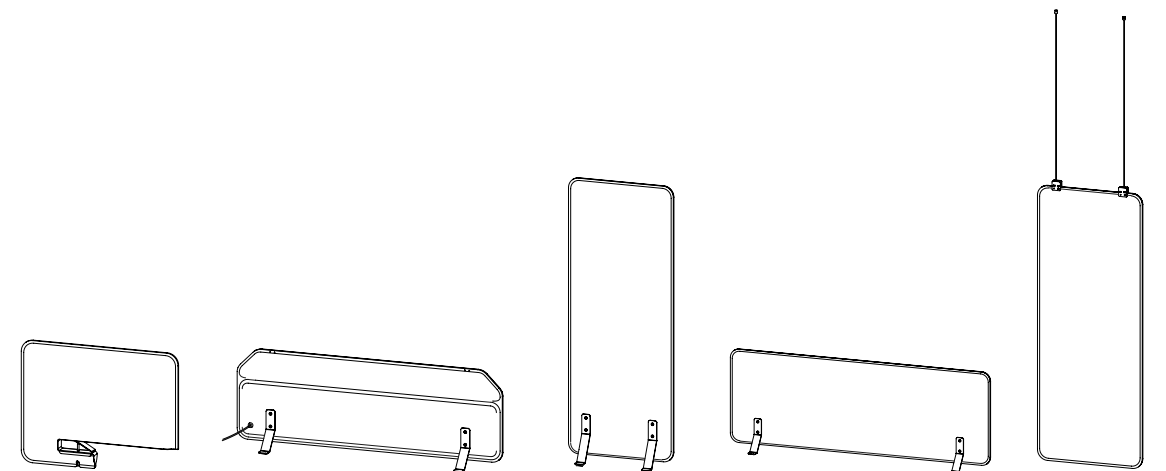

AK Series

Designed by
De Vorm

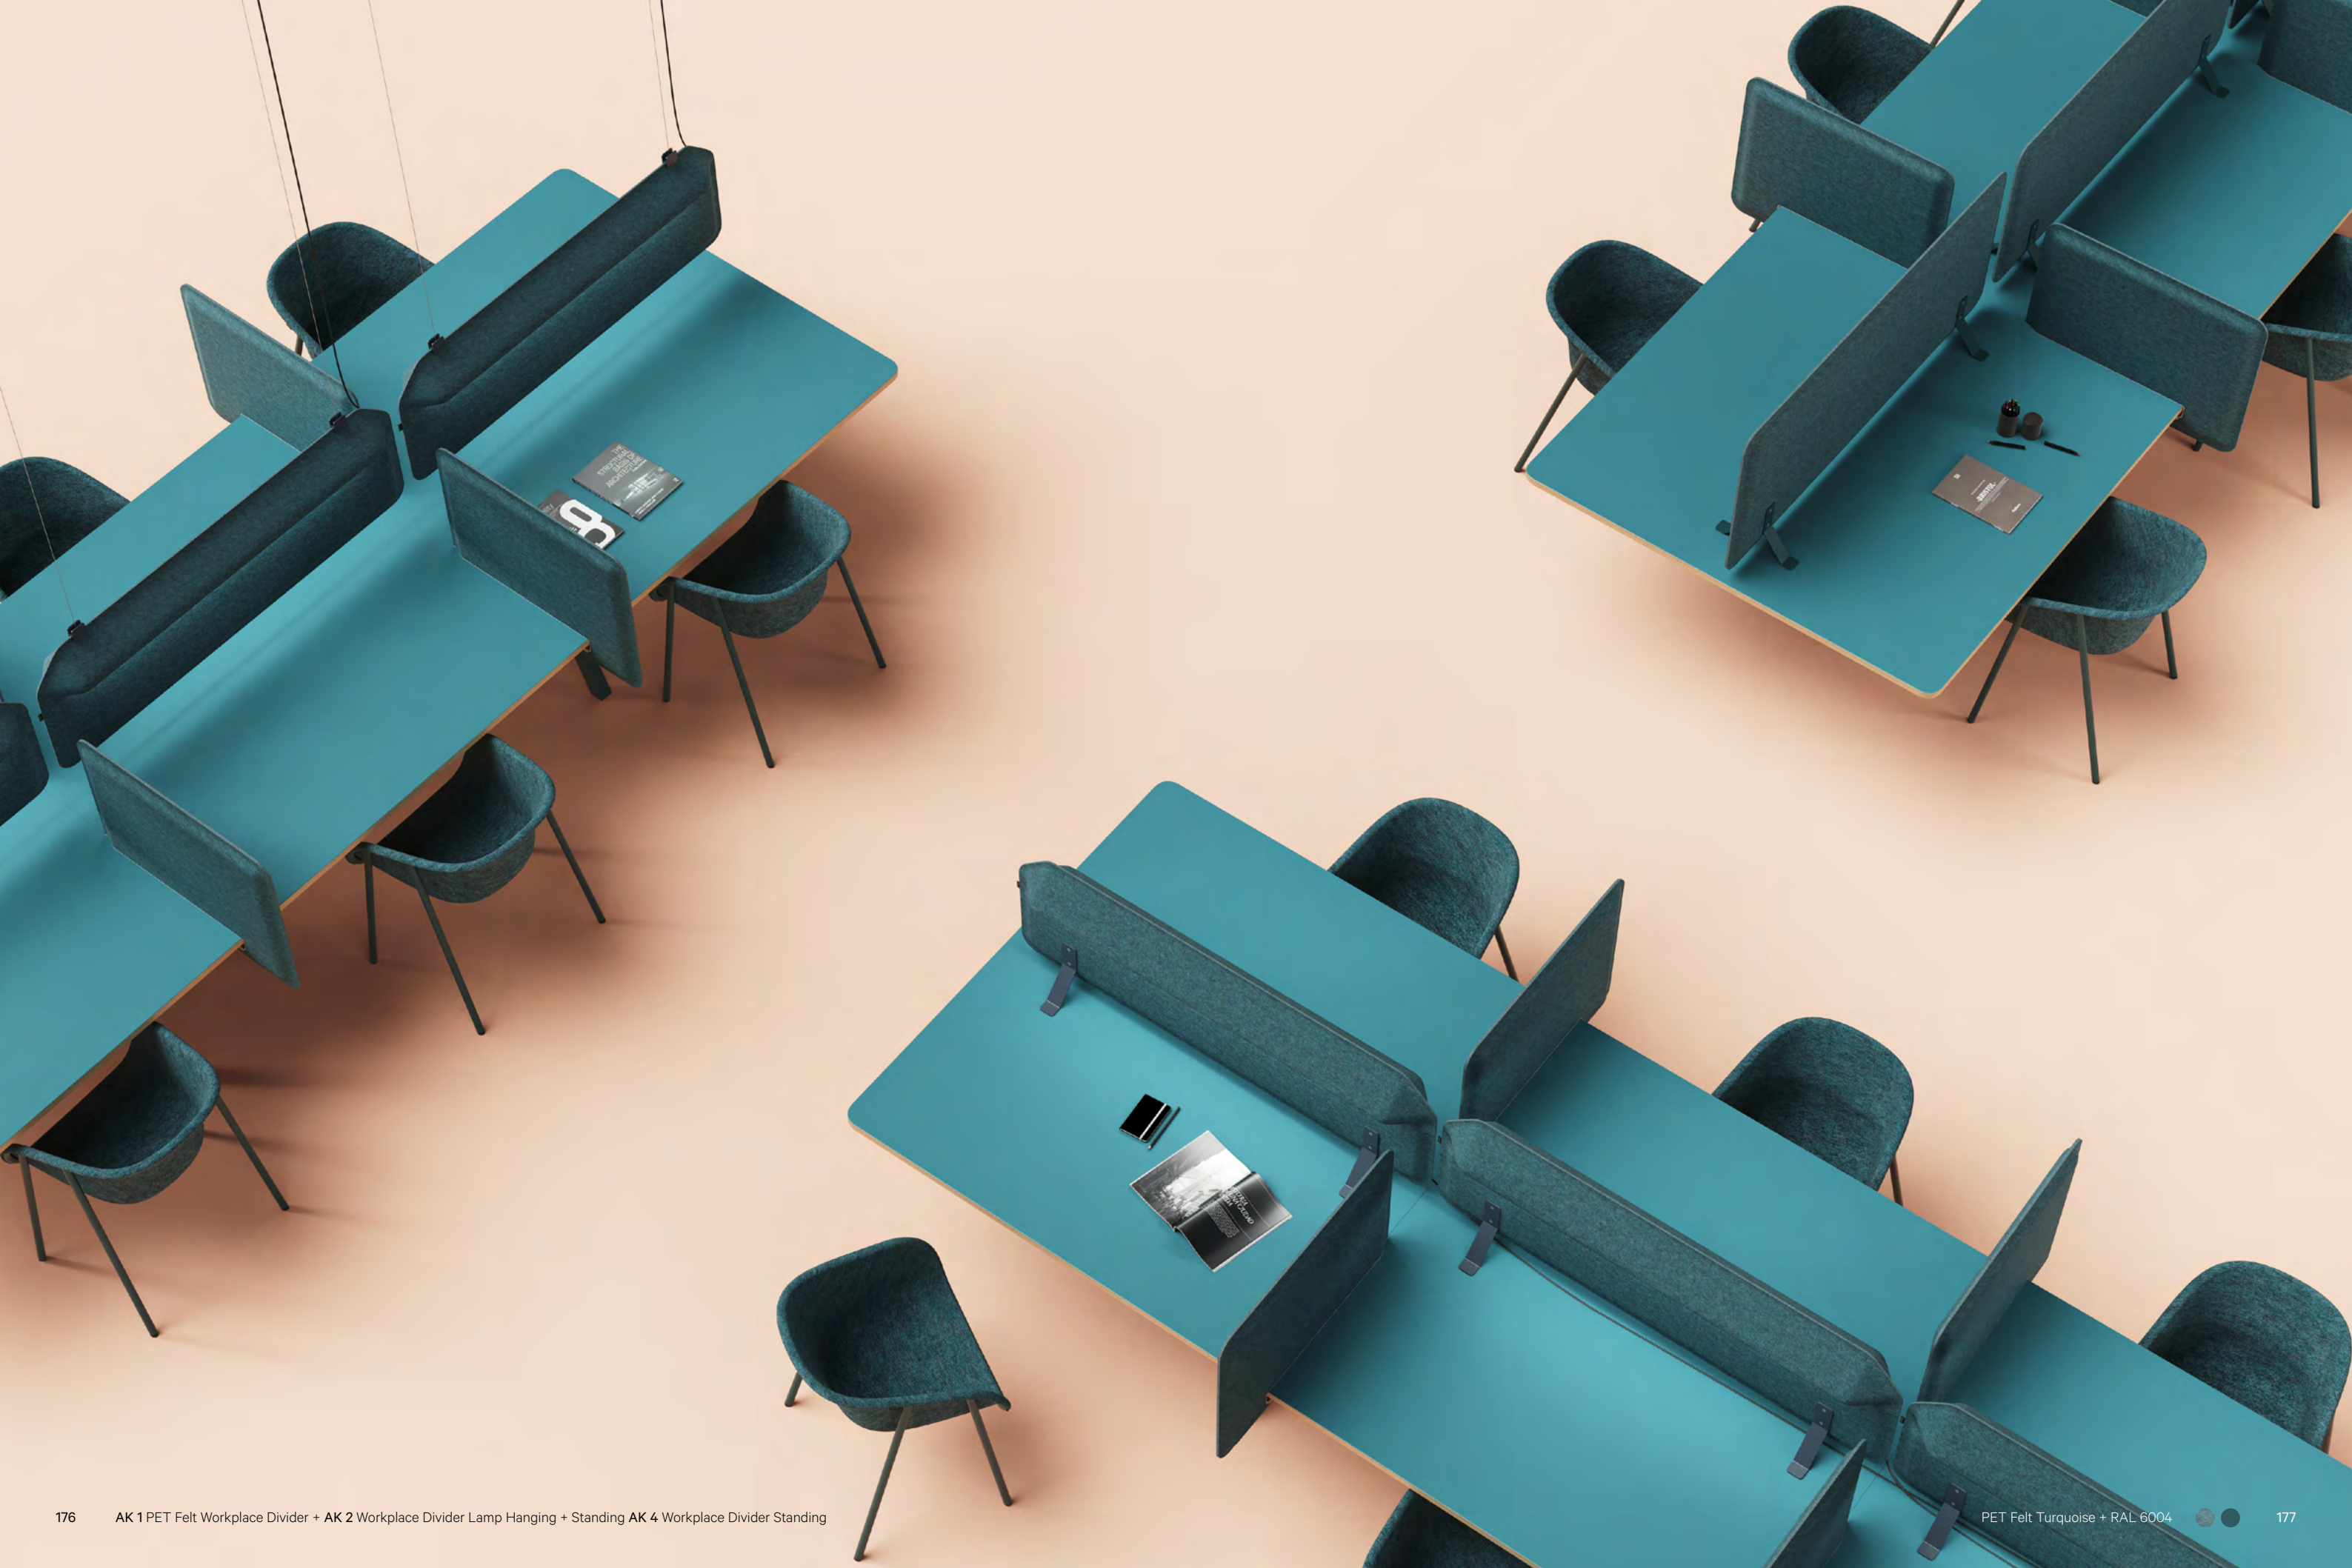

AK series offers functional partitioning solutions with a soft and inviting appearance. Ranging from desk screens to room dividers, the family demonstrates great sound-dampening properties thanks to the PET Felt shell and sound-absorbing filling. Adding acoustic comfort and visual privacy to any office, hospitality or public interior.

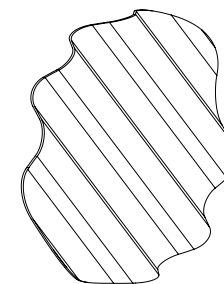

Onde PET Felt Acoustic Panel

Designed by
Perrine Vigneron

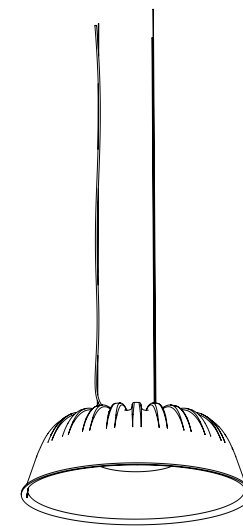

An aesthetic take on the acoustic panel that doesn't compromise sound-dampening qualities. Onde is pressed from PET Felt into an organic round shape, complemented with waves for improved acoustic performance. Its design allows scalable, overlapping placement to seamlessly cover any surface. Onde can be easily mounted on the wall using a smart magnetic fixture. Mix and match different PET Felt colours to create your own unique pattern.

Lighting

184 — 189	Fost PET Felt Acoustic Lamp
204 — 207	AK 2 Workplace Divider Lamp
208 — 215	LW Series
216 — 219	Mute Flow Floating Light

Fost PET Felt Acoustic Lamp

Designed by
De Vorm

With its generous dome shape and graphic expression, Fost Lamp offers a combined solution for acoustics and illumination. The PET felt lampshade has a soft texture and a bold ribbed pattern on the outside, while the inner surface features contrasting white fabric. Enveloping the LED module, the fabric gently disperses the light down, granting an inviting sensation of privacy and calmness.

Interior Personalities with Fost Lamp

To let you experience the possibilities of the Fost PET Felt lamp to the fullest, we used it to design six hospitality worlds. Inspired by De Vorm's interior personalities, these unique and varied interiors can be your source of inspiration for the next project.

Convinced that less is more, Minimalist longs for simplicity and lack of clutter. For them, beauty is simple; it lies in clean lines, neutral shades and pure functionality. Decoration is redundant, the essence is what truly matters. Minimalists know what they can do without, carefully selecting unique, crafted pieces that will serve a lifetime.

They value serenity and bring it to the surroundings through biophilic design and natural materials.

AK 2 Workplace Divider Lamp

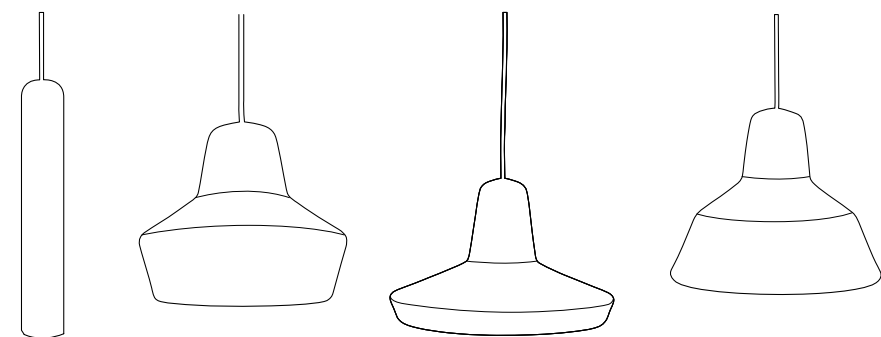

Designed by
Ivan Kasner & Uli Budde

AK 2 serves multiple functions, offering dual workspace lighting and desk partitioning. The rounded PET Felt shell grants the lamp its friendly appearance and soft texture. Reinforced with acoustic filling, it also provides a gentle sound-dampening effect. AK 2 is ceiling-suspended and available in eleven PET Felt colour blends, offering many design possibilities. Suitable for shared desks in offices, co-working spaces and schools.

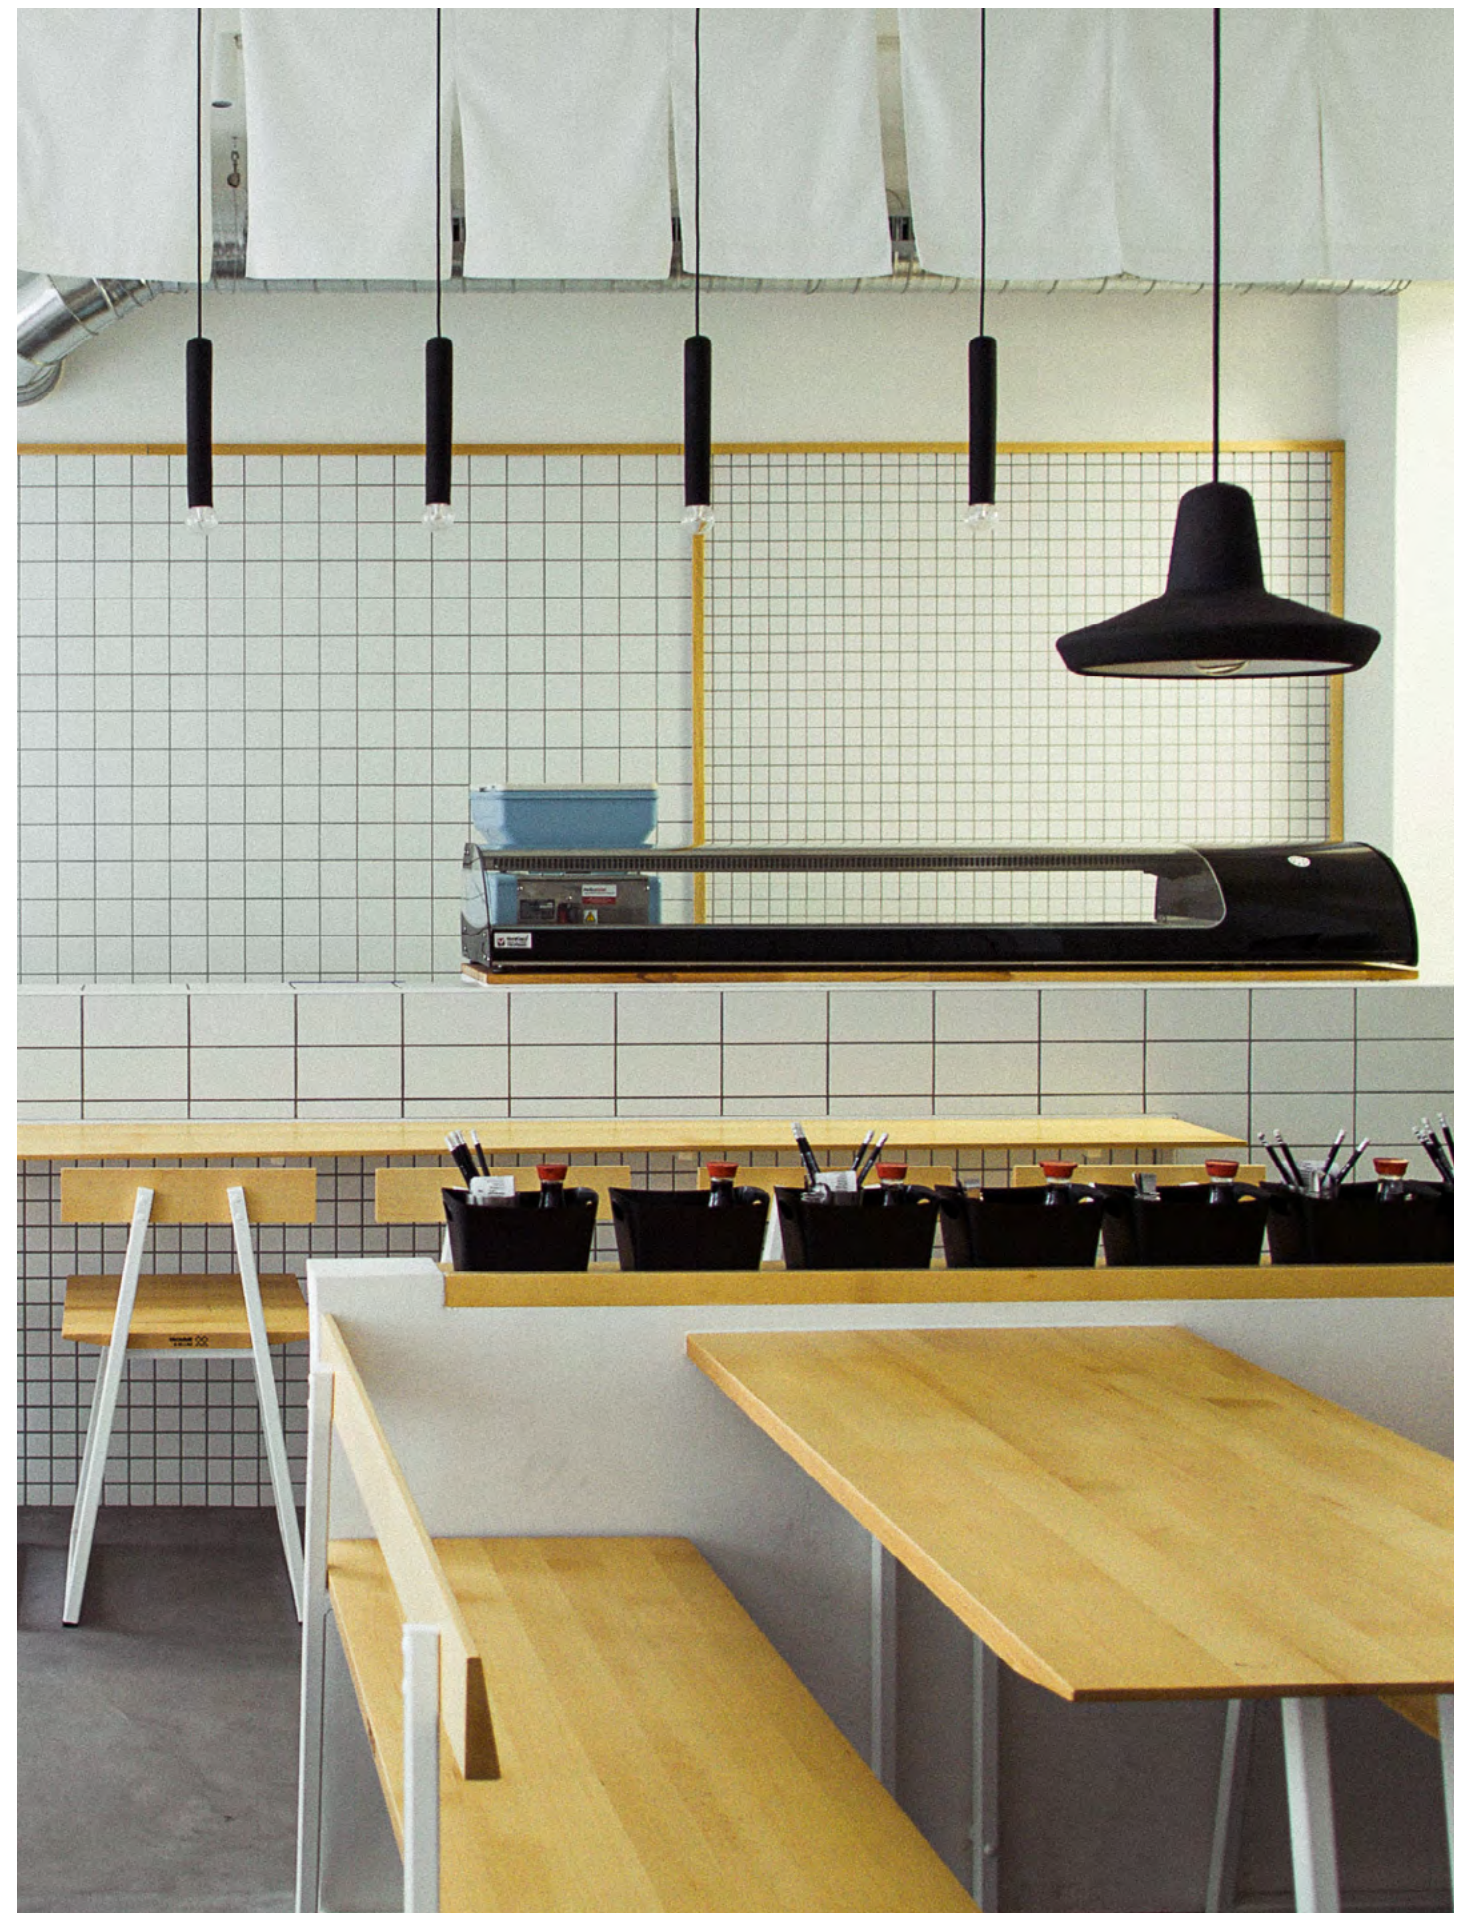

LW Series

Designed by
Laurens van Wieringen

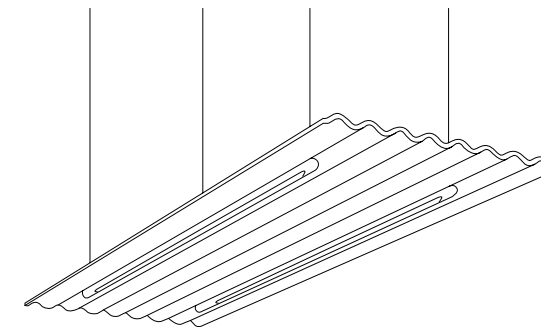

The design of LW series was inspired by industrial lighting. A new perspective on old factory lamps, it offers the same look in a surprisingly flexible form. LW lamps are made of soft rubber and available in various colour combinations, making them a refined addition to any interior.

Mute Flow Floating Light

Designed by
De Vorm

Mute Flow Floating Light is a two-in-one solution for acoustics and illumination. The panel is ceiling-suspended and equipped with two LED lamps. Made from sound-dampening PET Felt material, Mute Flow Floating Light minimises floor-to-ceiling slap echo in open-plan offices, public spaces and restaurants. Choose from eleven unique PET Felt blends and many custom colours for the tubes.

DeVorm

DeVorm

DeVorm

The Architect's Toolbox

Smart, customisable
furniture solutions that
work anywhere, anytime.

We are made to be different

De Vorm offers a bespoke furniture formula for interior architects, supporting them to create custom concepts for public and community spaces. Always sustainably produced and compliant to ever-evolving regulations.

Discover De Vorm's revolutionary approach to furniture design. Tailor every element to your architectural vision with our sustainable, customisable solutions. Join our virtual showroom tour and turn your creative concepts into reality. Redefine space with furniture that adapts to your ideas.

[book your virtual tour now](#)

For too long, the furniture industry has been dominated by design heritage, restricting architects to specific dimensions and expensive bespoke work.

We believe furniture has the potential to serve an architects' vision, not guide it. We aim to build the ultimate architect's toolbox — where every architect can create custom furniture solutions at scale.

We researched iconic chairs to define the most comfortable spine, and reshaped production processes to offer a furniture formula — together, they form a solid foundation for your imagination. Fueled by a sustainable drive to change, we build smart furniture solutions that work anywhere, anytime.

Pick the color, shape, combination, and finish you need to bring your spatial vision to reality. Show us your ideas to spark conversation and connection, and we'll make it happen.

Made to be Different
De Vorm

Collection

Hale

Series

Hale was inspired by a classic school chair – simple, functional, no-nonsense. Made from PET Felt, the seat and backrest have a soft texture and gently curved shape granting outstanding comfort. Combined with a slender steel frame, few elements grant Hale its clean expression yet surprisingly extensive functionality. This series of chairs is easily stackable and fully customisable in colours and materials, making it suitable for various interior settings.

Innovative educational concept

Interior design
Raumreaktion

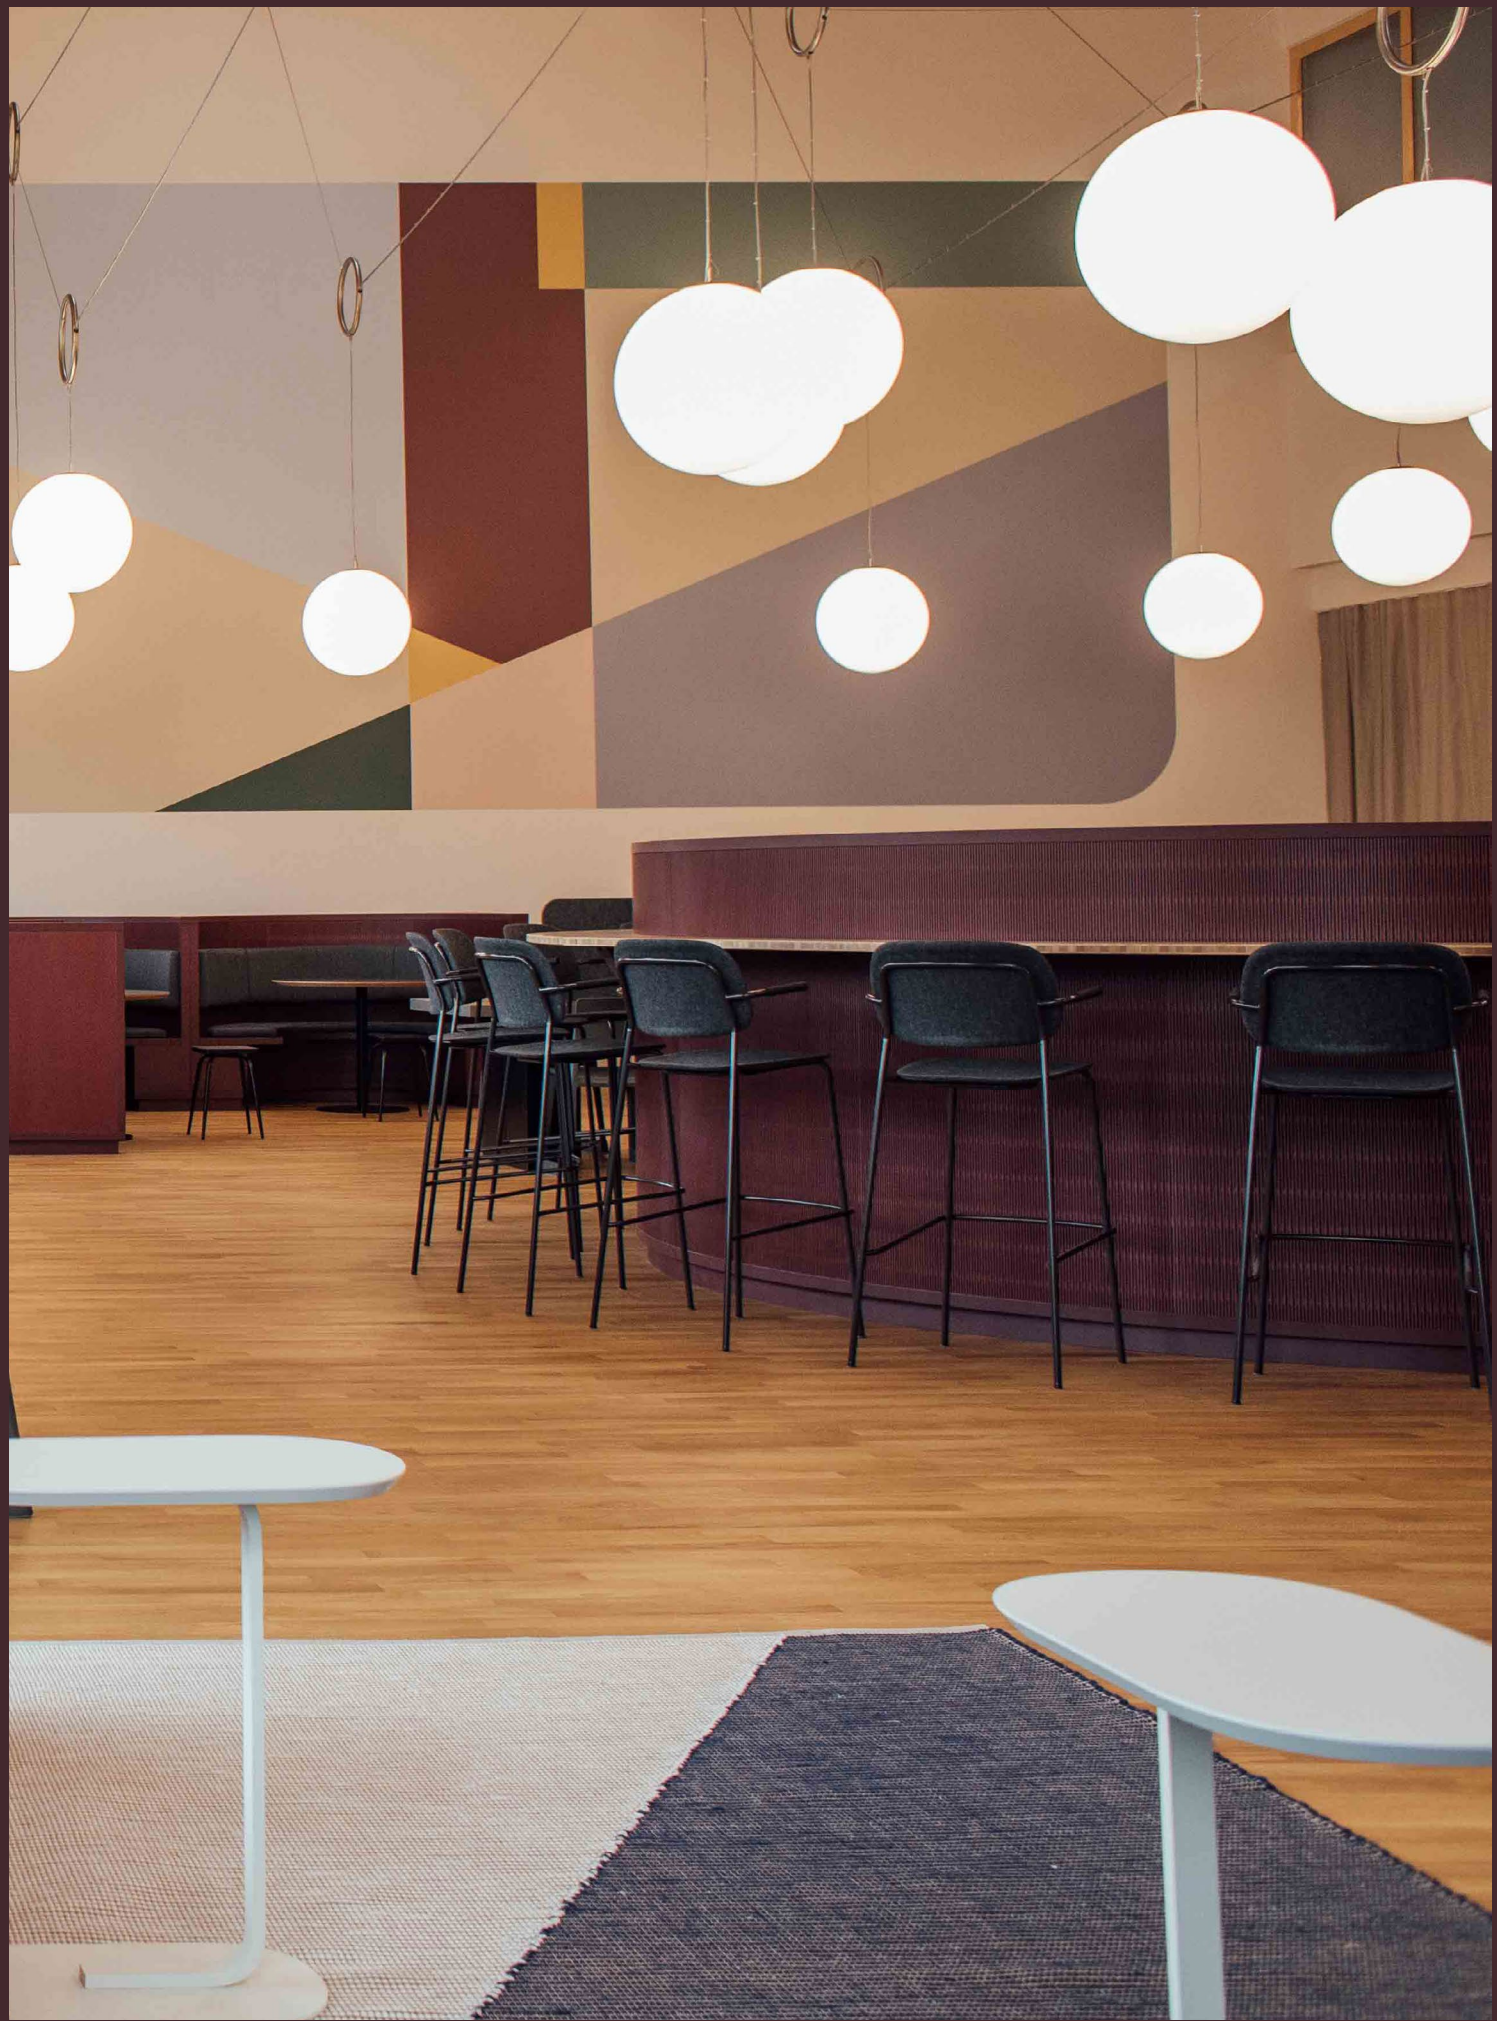

Client
Alemannenschule
Wutöschingen

Photography
Valentina Verdesca

Location
Wutöschingen, Germany

The Alemannenschule Wutöschingen is the winner of the German School Award 2019 and stands for an innovative educational concept. This school has no teachers and no classrooms and is considered one of the best high schools in Germany. The 400m² double height co-learning area is the functional and symbolic center of the space. It is the heart where collaboration takes place. The soft, round shapes of the customised furniture, the cosmic lighting installation, the vibrant colours, various sitting options as well as the mandala like art wall are all catering towards stimulating the psychological and physical comfort of the user group.

The LJ series consists of four chairs and stools, each with its own function. The curvilinear PET Felt seat and straightforward bent metal frame result in a design that is both functional and aesthetic. The chairs provide an ergonomically curved seat and back support for outstanding comfort. Designed to be fully customisable, LJ series allows you to create a perfectly matching seating for any space and need.

Balanced colours and materials

IKON Photography

Client
Workspot

Location
Rotterdam,
The Netherlands

The new interior of the Verdant project in the Weenatower Rotterdam blends form and function, creating a comfortable and unique space that is both aesthetically pleasing and practical for daily use.

The round architecture of the building was an inspiration and is highlighted by incorporating curved lines and rounded edges into the design, creating a contrast with the straight lines and angles of the usual office spaces. De Vorm's PET Felt furniture helps to provide a warm and inviting ambience, enhancing the overall atmosphere of the interior.

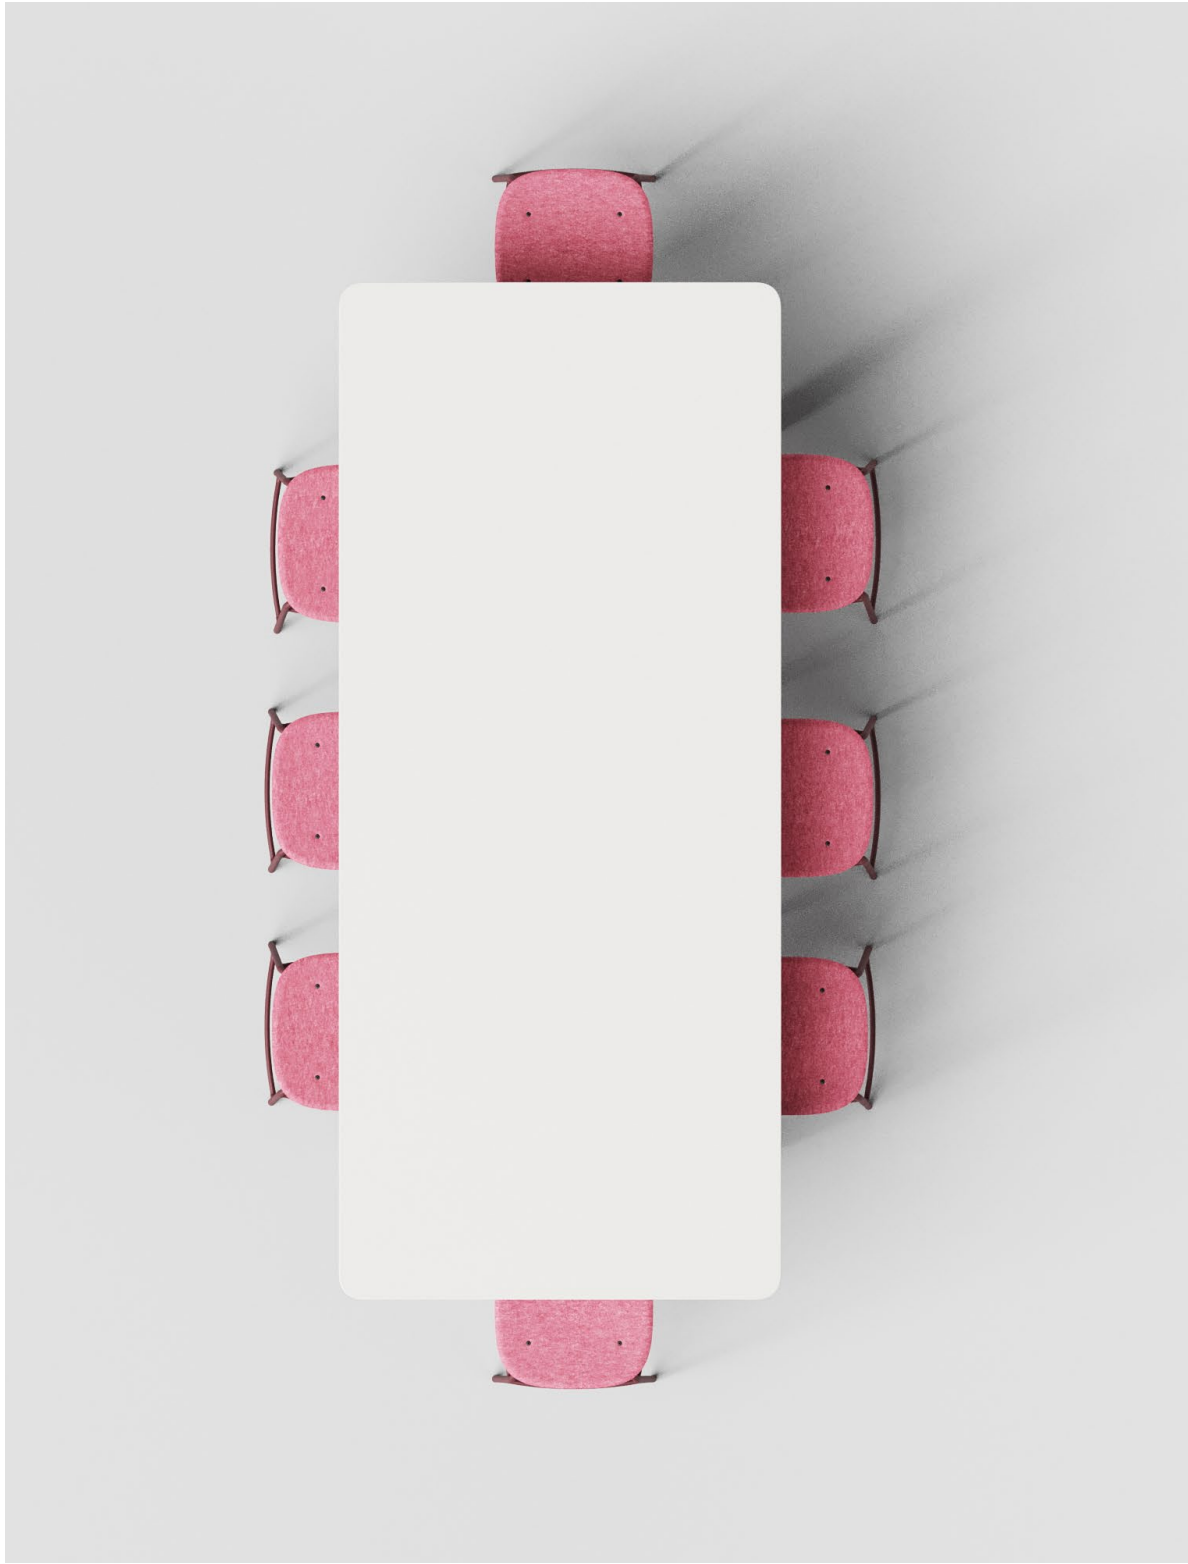

Twist

Series

With its no-nonsense functionality and versatile appearance, Twist stools meet the needs for occasional seating in social spaces. The tubular steel frame adds a notion of lightness, while the subtle curvature of the PET Felt seat offers proper seating comfort. Thanks to their light weight and double-sided grip, the stools can be stacked when extra space is needed, and easily moved around to adjust the setting to your needs.

Pod

Privacy Chair

Designed with privacy in mind, Pod chair grants a sense of seclusion and extensive seating comfort. The embracing PET Felt shell has a pleasant soft texture and a subtle sound-dampening effect. Combined with an elegant ash frame and two upholstered cushions, they create a unique expression making the chair a true eye-catcher. Pod solves privacy issues in breakout areas, hotel lobbies and lounge zones. It comes in eleven unique PET Felt blends with many options for frame colour and upholstery.

Nook

Lounge Chair

Nook is a generous lounge chair that embraces the need for privacy within social settings. Its distinctive shape is determined by a PET Felt shell granting the chair its soft and inviting expression. An insert in the shell accommodates an upholstered cushion for a superior level of comfort. Enveloping the shell from the rear is a slender steel frame that holds everything in place, outlining the chair's original form. Nook is suitable for hotel lobbies, lounge zones and waiting rooms. Choose from eleven PET Felt blends and numerous options for frame and upholstery.

Mino

Modular System

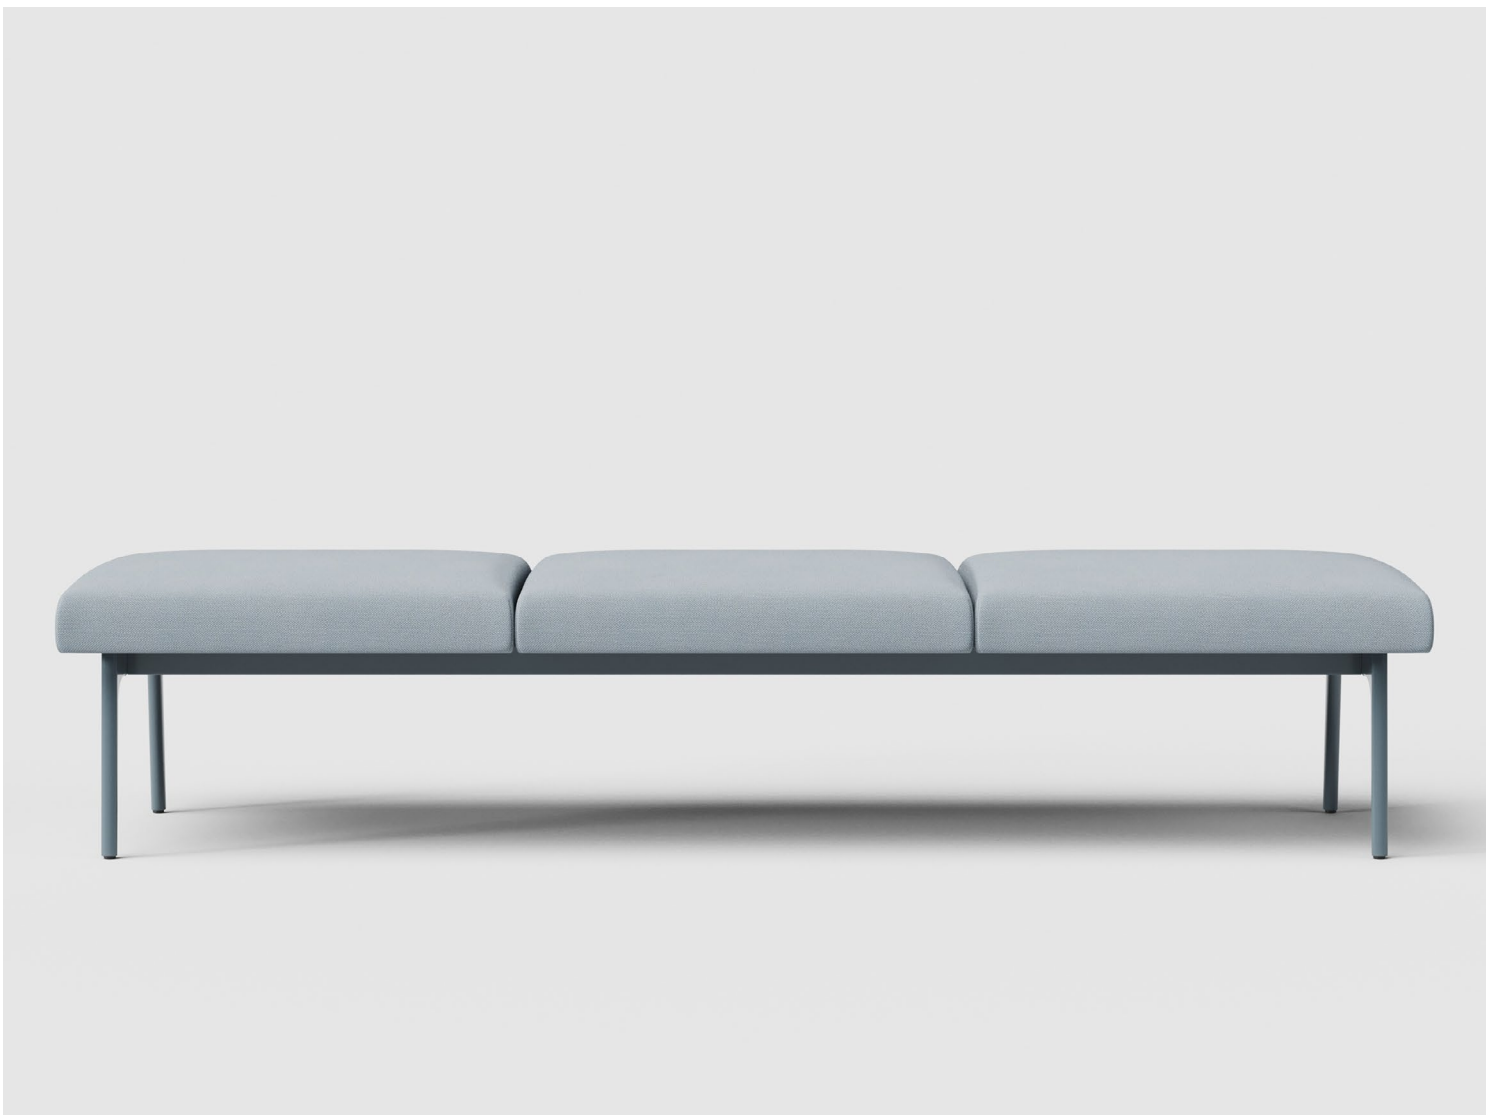

The elegant and multi-functional design of the Mino makes it the perfect choice for various environments. This modular sofa effortlessly adapts to any space, whether in professional settings, such as offices and public spaces, or more relaxed environments such as hotel lobbies and restaurants. Equip your Mino Sofa with a sleek side table or add a Bachmann PIX power supply unit to charge devices. These extra options enhance the functionality and modern look of the sofa and can be added afterwards. Also, you can combine the sofa with the Pico coffee table, specifically designed to fit the Mino series.

Big

Modular Table System

One system, endless design possibilities. Big series can be configured to the exact needs of your space. Thanks to its smart modular frame, this table system comes in three standard heights and can take extensive sizes with a minimum amount of legs. Make it as large as you want, choose your own finishes and customise the tabletop shape to match any context.

Big Round

Modular Table System

Big Round offers endless design possibilities in every sense of the word. This smart table system features a modular frame allowing to take large diameters on just three legs. Bring a sense of equality to any meeting or dining setting with an inviting round tabletop available in a wide selection of finishes.

MG

Series

MG Series consists of four functional tables that have a clean and modest appearance. Three tables with distinction in size — and therefore in function. The squared tabletop made from high-quality wood veneer has a soft appearance due to the rounded corners, whilst the powder-coated steel frame gives the side table a robust touch. The tables can be used in various settings such as offices, restaurants and bars.

Unique brand experience

Architects
Gensler,
Hollandse Nieuwe

Location
Amsterdam,
The Netherlands

Gensler and Hollandse Nieuwe translated the brand story of a global sports company in Amsterdam through clear visual language and user experience. A black and light grey base is enriched with fresh colours and graphic elements. Located in Amsterdam, it offers a unique brand experience across 24.500 m² of office space. A black and light grey base is enriched with fresh colours and graphic elements. The new campus is designed to support activity-based working, offering multipurpose for agile and hybrid working styles. De Vorm's LJ and Hale seating solutions were incorporated into the meeting centre and other social areas of the campus.

Pico

Coffee Table

The Pico Coffee Table offers an inviting, elegant expression and smart functionality. Its appealing, round tabletop and sleek metal frame are complementary for any setting, from lobbies and halls to offices and hospitality spaces.

Mute

Series

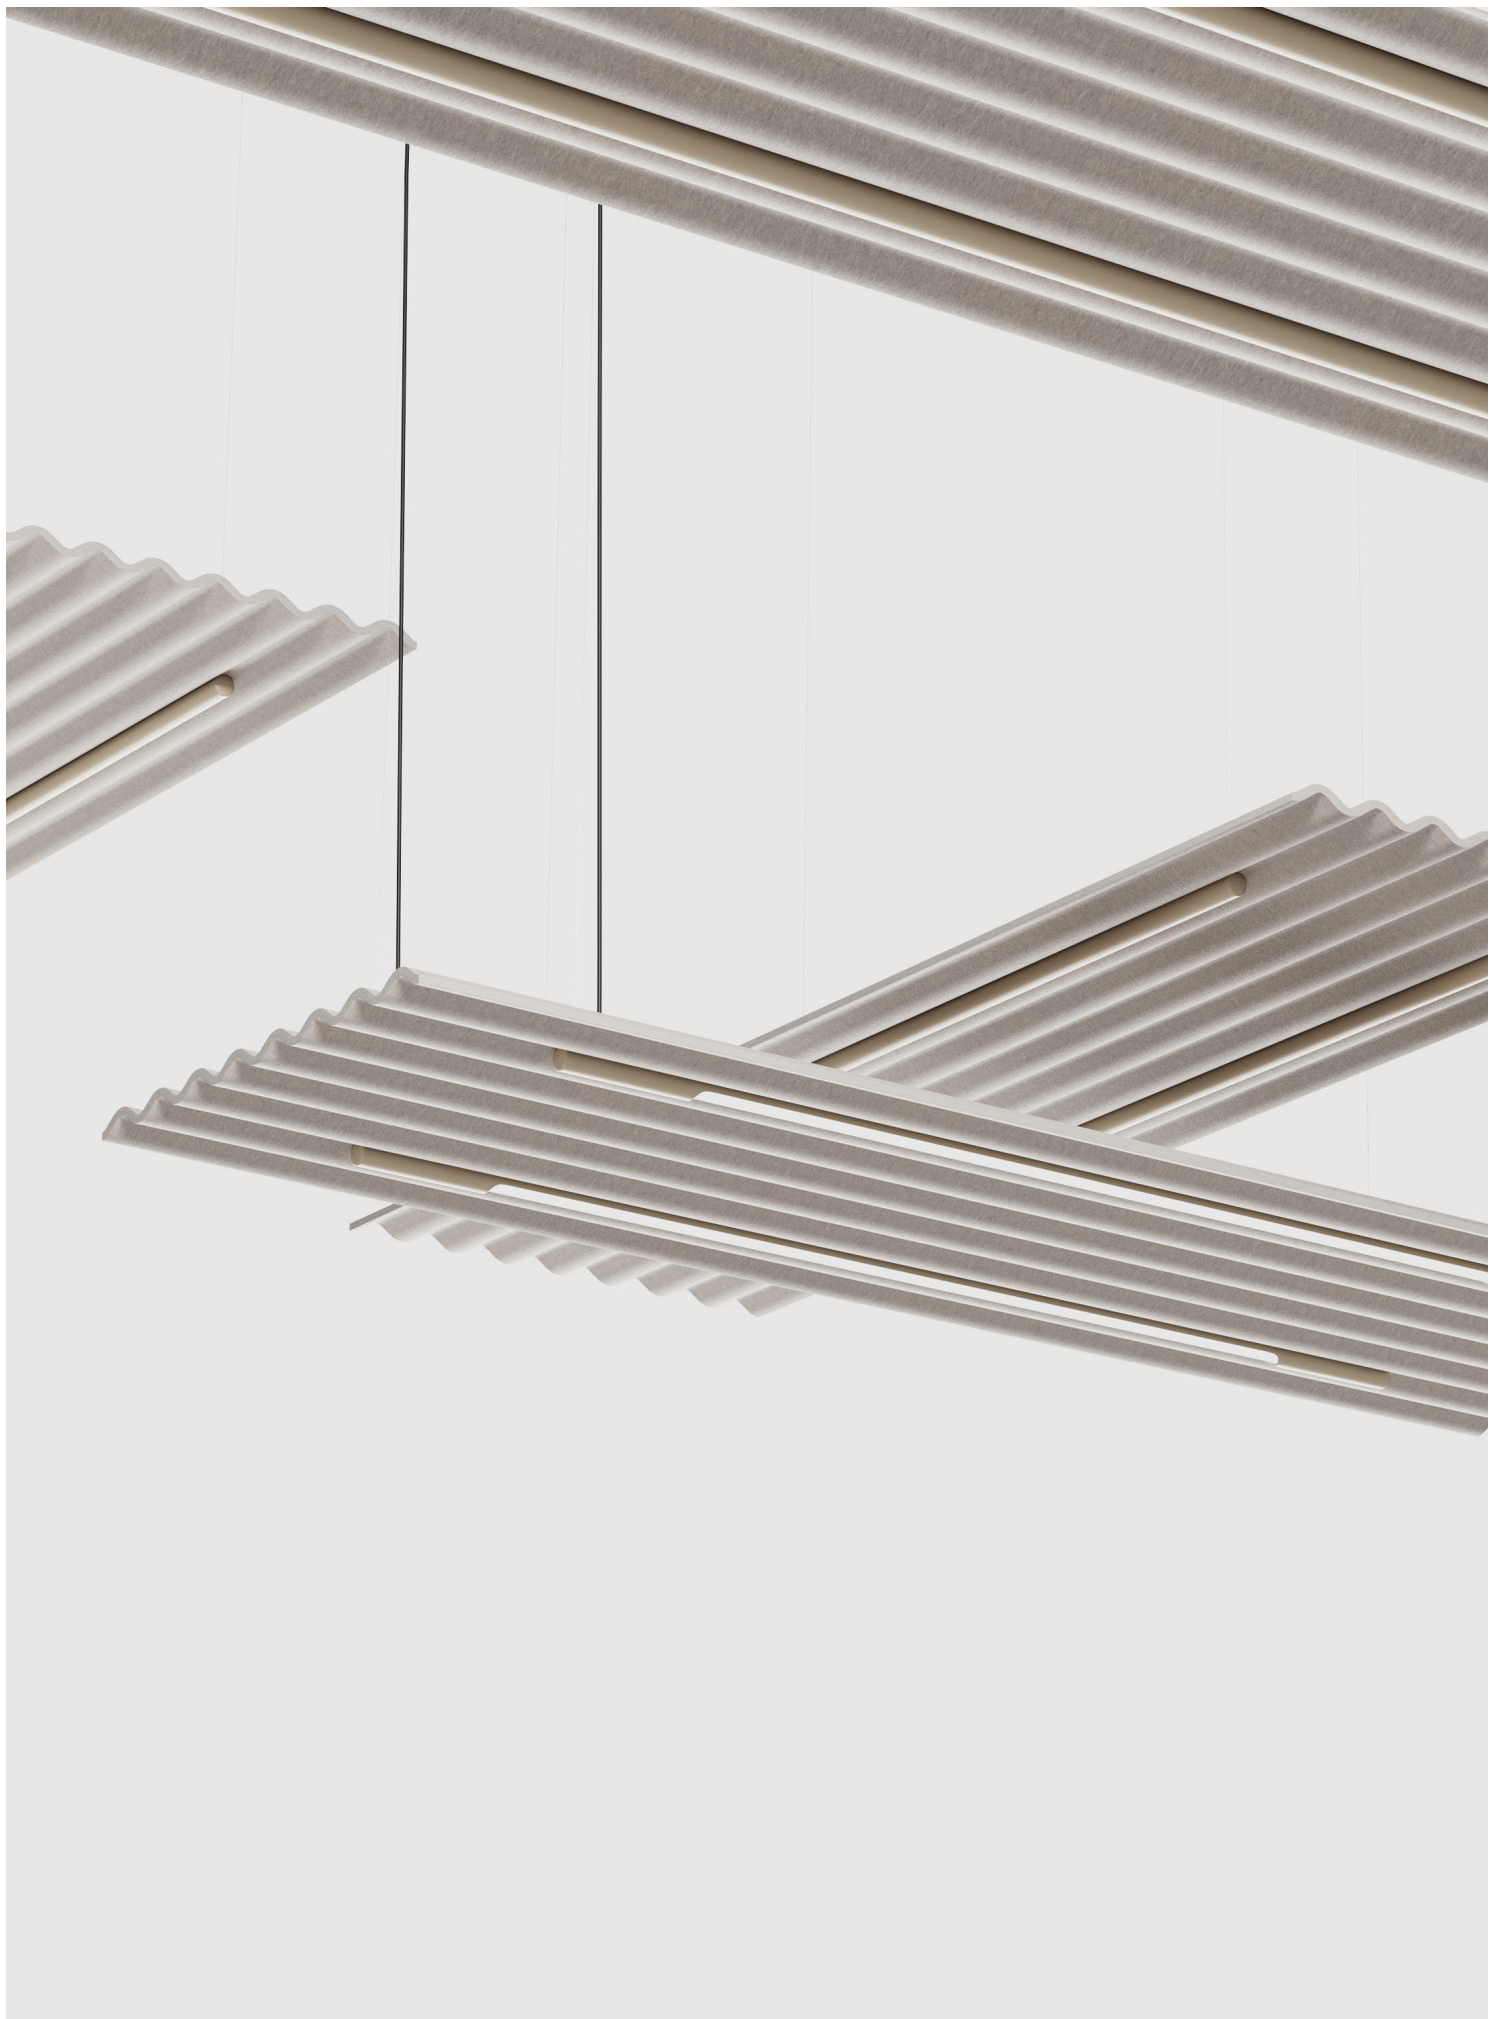

Pleasing to the eyes and comfortable to the ears. Mute series offers versatile acoustic solutions for any place and need. Made from PET Felt, the family ranges from wall panels to room dividers, offering a distinctive soft texture and many design options. Functional and aesthetic, Mute series will solve acoustic issues without compromising the looks of your interior.

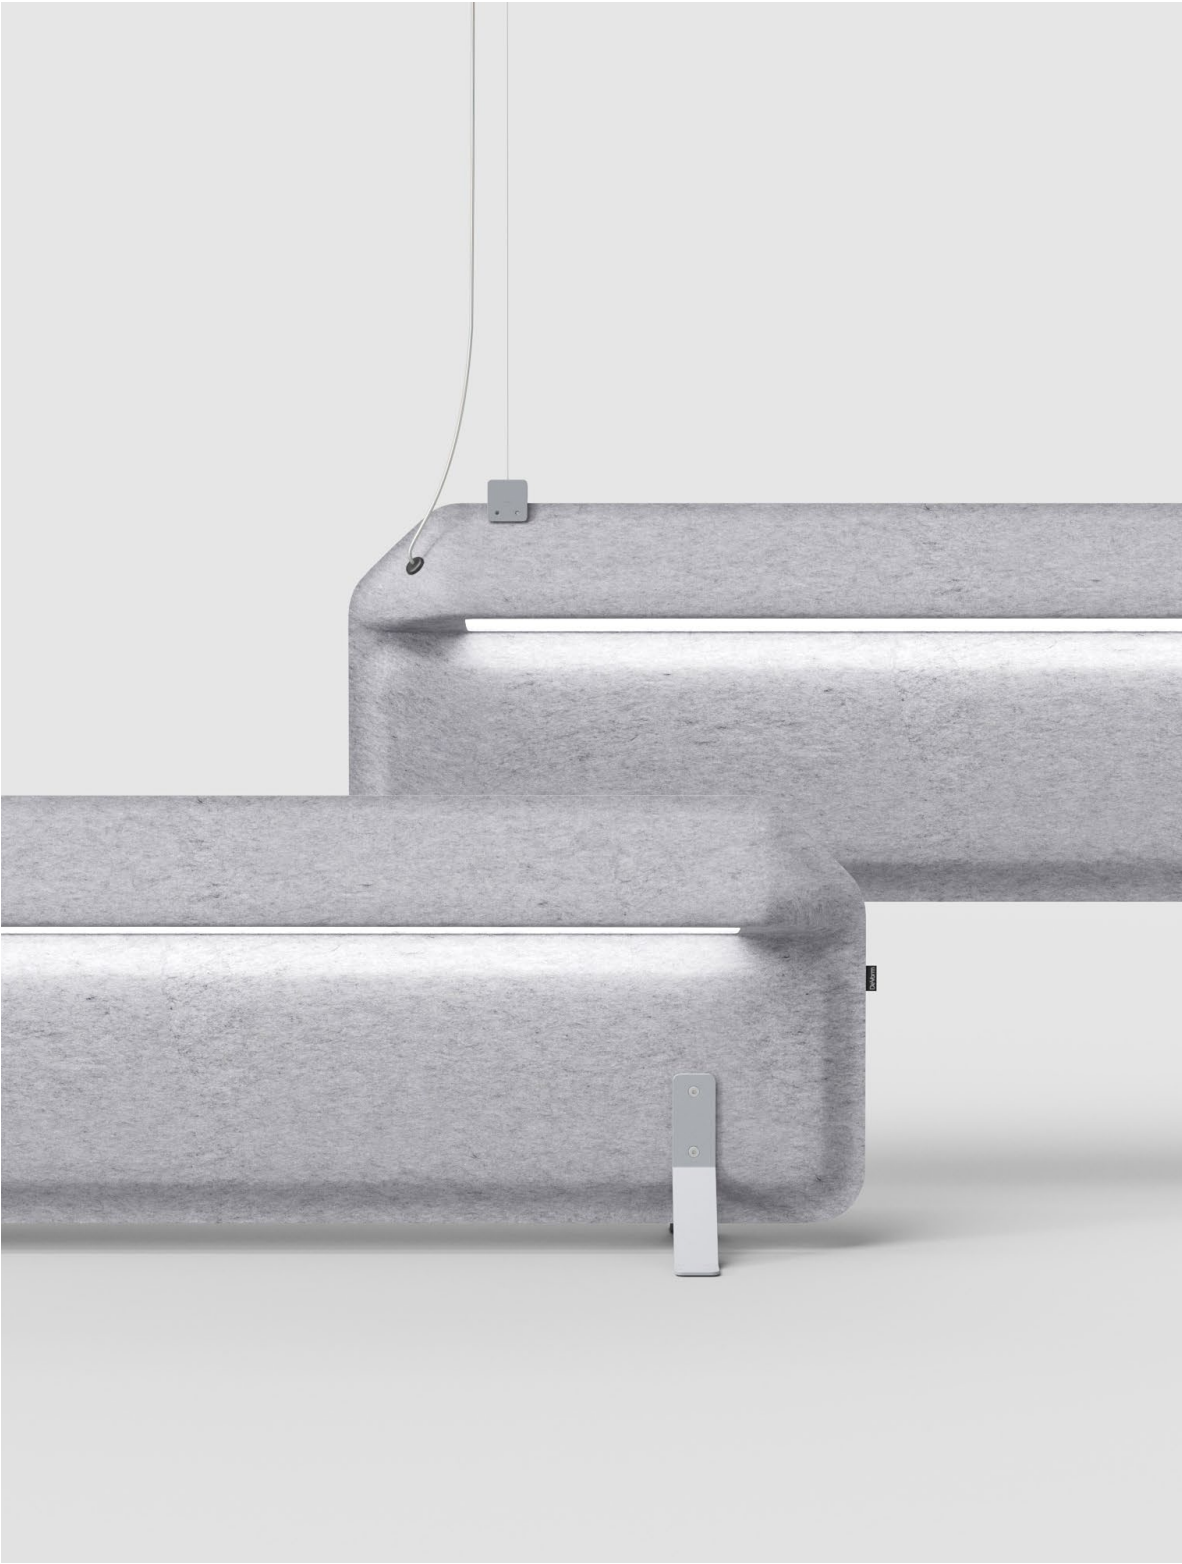

AK

AK 1,3,4 Design by De Vorm
AK 2 Design by Ivan Kasner + Uli Budde

Series

AK series offers functional partitioning solutions with a soft and inviting appearance. Ranging from desk screens to room dividers, the family demonstrates great sound-dampening properties thanks to the PET Felt shell and sound-absorbing filling. Adding acoustic comfort and visual privacy to any office, hospitality or public interior.

Fost

Series

With its generous dome shape and graphic expression, Fost Series offer a combined solution for acoustics and illumination. The PET felt lampshade has a soft texture and a bold ribbed pattern on the outside, while the inner surface features contrasting white fabric. Enveloping the LED module, the fabric gently disperses the light down, granting an inviting sensation of privacy and calmness.

Covage, Paris

Interior design
Sowen Group

Client
Covage

Photography
Jared Chulski

Location
Paris, France

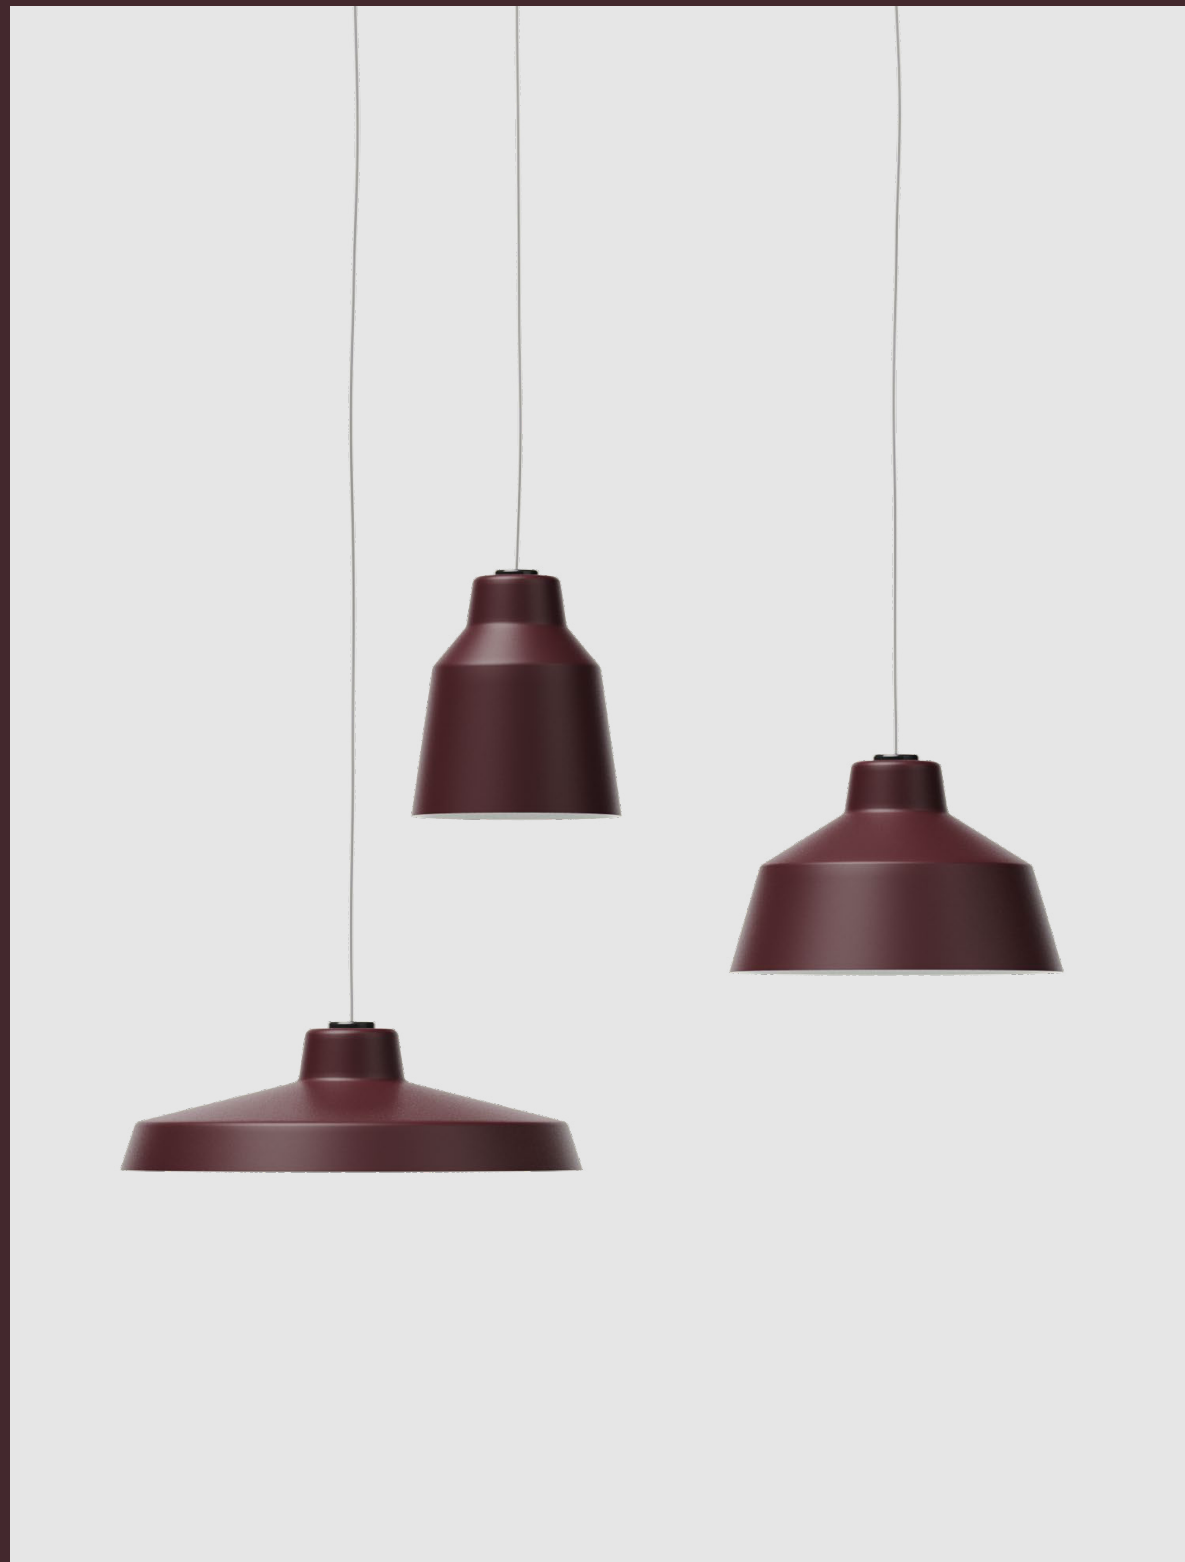

In the heart of Trinity Tower, which has been awarded as the best office tower in the world, Sowen Group has been asked to design the interior for telecom company COVAGE's (Altitude Group) - an impressive 6,000m² office space. Trinity is an architectural challenge and a tower designed to be lived in. Respectful of its surroundings, Trinity provides an open, inviting and inspiring space for residents. LJ series, Lite tables and Fost are coming together in the complete interior. This makes it possible to create unique and personal atmospheres in line with the client's DNA. The durable material and modern design fit perfectly into COVAGE's office environment.

Ratio

Series

Recognisable by their compact and sleek design, the Ratio series offers a new take on classic metal lamps. Three pendants feature a spun steel shade with a seamlessly embedded LED module. Due to their similar outline design but distinctive diameter-height ratio, these lamps can be easily combined to create a playful and captivating setting. A timeless and functional addition to any interior, from offices to hospitality settings.
