Lohko Boxes feature our original nature-inspired soundproof workspaces. They include standard acoustic panels and a centrally placed glass door, ranging from phone booths up to 6-person meeting pods.

Lohko Picea provides a calm, focused workspace with larger acoustic panels and a side-positioned door, making it an efficient and practical solution for any office.

Sustainability

At Taiga, we believe in timeless design that respects nature. The decisions we make reflects our commitment to reducing environmental impact, while creating calming, restorative workspaces that bring the beauty of Nordic nature indoors.

Our Life Cycle Assessments (LCAs) and Environmental Product Declarations (EPDs) ensure full transparency on the carbon footprint of our products, from raw materials to end-of-life. We are proud to maintain a low carbon footprint, largely due to choosing renewable materials in our product, using renewable energy in production, and having highly localized supply chains.

Our workspaces are designed for longevity. The modular nature of our products allows for reconfiguration and repair, reducing waste and extending usability. Even during the use phase, energy efficiency is prioritized with features like automated lighting and ventilation to minimize power consumption.

Learn more in our product sustainability report: www.taigaconcept.fi/sustainability

Environmental Product Declarations

Environmental Product Declarations EPDs represent the culmination of a six-month-long life cycle assessment program, where every aspect of the product's life span was measured and accounted for. The result is a comprehensive understanding of each of our products' impact on the environment, from the carbon footprint right down to particulate matter emissions. Not only does this data give us pride in our recent steps toward sustainability, but it also allows us to go forward with our product development in a more focused and meaningful way.

Find EPDs for Lohko Box and Picea products on the EPD International database: www.environdec.com/library

Where the *Taiga* story begins

Taiga was born from a desire to bring the quiet and calming effects of Nordic nature into the workplace. By using real, sustainable, Nordic nature-inspired materials, we create artfully crafted distraction-free workspaces.

With Taiga, you can transform your workplace into a peaceful, aesthetically pleasing environment that inspires — where everyone can recharge, focus, and thrive.

Our *design* philosophy

"The starting point was Scandinavian simplicity and the desire to create a product portfolio that offers timeless design and space. The result is a refined and simple concept inspired by Nordic nature and its silence.

Like many Nordics, I feel the greatest sense of freedom when I'm connected with nature. There's no more relaxing environment than a snow-covered forest or a still lake in the summertime.

This connection to nature runs through every design — and that's what makes Taiga unique."

- Pekka Eskelinen, Head of Design

Your *natural* workspace

The concept of a natural workspace goes beyond aesthetics, embracing all aspects of Taiga's designs that make work feel like a natural, enjoyable experience. Every detail, from cozy acoustics to soothing lighting, is thoughtfully designed to create a comfortable environment that promotes well-being and productivity. Your natural workspace is where you can find focus, reach a flow state, and be inspired to do your best work.

A simple concept drawn out of
Nordic nature and its silence.

Box

1-7m²

Lohko Box

The original nature-inspired soundproof workspaces. Lohko Boxes are thoughtfully designed office pods and booths for private work, coworking, and meetings. They feature standard acoustic panels and a centrally placed glass door. From essential phone booths to spacious 6-person meeting booths, Lohko Box is your go-to modular space solution, bringing nature into your work environment with uncompromised simplicity.

Picea

3m²

Lohko Picea

Lohko Picea offers a calm, focused workspace for private work. Its efficient design maximizes the available space, featuring larger acoustic panels and a side-positioned door, making it a practical solution for any office environment.

Flex

10-28m²

Lohko Flex

A large modular solution where versatility meets spaciousness. Lohko Flex offers floorless spaces ranging from 10 to 28 square meters, providing dynamic solutions that can seamlessly integrate the technology and interiors you need. Transform the Flex into comfortable conference rooms, interactive learning spaces, or inviting waiting areas.

Furniture

Add-on products

Lohko Furniture

Lohko Furniture includes thoughtfully designed add-on products to make the most out of your Lohko workspaces. They maximize the sense of space and create optimal environments for even longer stays. The various seating options, tables, and accessories allow for flexible creation of the right solution for your office, from private work zones to collaborative environments.

Carefully sourced
renewable materials

Materials

Taiga is committed to using the highest percentage of renewable materials. All our wooden elements are sourced from FSC-certified suppliers, meaning you can trust that our products are created without compromising the environment. Our stewardship philosophy extends to all our materials, including our carpet that is recyclable and our upholstery fabric, made from 100% post-consumer recycled polyester. We ensure that the materials we utilize are safe and sustainable, backed by the appropriate certification to demonstrate their quality and safety standards.

Made-to-order with
localised production

Manufacturing

Taiga workspaces are manufactured in Northern Europe. By partnering with environmentally conscious manufacturers, we have significantly reduced the environmental impact of our production.

We selected our main manufacturer because of their alignment with our values and approach to sustainability. They use electricity from renewable sources, certified to be sourced from solar farms, and supplemented by their own rooftop solar panel system. This powers the core processes of our manufacturing.

Raw materials are transformed into Taiga's unique 'sandwich' structure. Compiled elements are then shaped into their final forms by a CNC machine. The final steps — sanding, painting, and varnishing — use only nontoxic materials in controlled environments.

Assembled on location
by *Taiga-trained* specialists

Inspired workspaces

Our client base spans across industry leaders and smaller workplace settings. From expansive projects to minimalist spaces, our mission resonates with many: elevating productivity, creating serene environments, and ensuring every workspace is a haven for growth.

Our goal is to understand the unique situations of each client and offer the optimal solution, from small private office pods and phone booths to large space solutions. We achieve this through our strong desire to serve and our ability to customise and create beautiful, tailored solutions when needed.

Ideas for layouts

Taiga's modular workspaces offer the flexibility to create diverse office zones, seamlessly transitioning between productivity and relaxation. Whether it's a quiet focus pod for deep concentration, an adaptable coworking space, a meeting room for private discussions, or a relax and rewind area, Taiga's designs support both focused work and wellbeing.

Sustainability

At Taiga, we believe in timeless design that respects nature. The decisions we make reflect our commitment to reducing environmental impact, while creating calming, restorative workspaces that bring the beauty of Nordic nature indoors.

Our Life Cycle Assessments (LCAs) and Environmental Product Declarations (EPDs) ensure full transparency on the carbon footprint of our products, from raw materials to end-of-life. We are proud to maintain a low carbon footprint, largely due to choosing renewable materials in our product, using renewable energy in production, and having highly localized supply chains.

Our workspaces are designed for longevity. The modular nature of our products allows for reconfiguration and repair, reducing waste and extending usability. Even during the use phase, energy efficiency is prioritized with features like automated lighting and ventilation to minimize power consumption.

Find our verified environmental product declarations on the EPD International database: www.environdec.com/library
