

FIBER SIDE CHAIR – WOOD BASE

ISKOS BERLIN ON THE DESIGN “One of the most difficult and noble disciplines is to design without eccentricity, creating simple, well-functioning and almost ordinary objects that nevertheless have strong identities. We designed Fiber Side Chair to do just that through a clear sculptural language that refuses to compromise on comfort. It’s a chair stripped of all unnecessary layers. The iconic form marries soft, embracing curves with an innovative wood fiber composite, giving Fiber Side Chair a unique expression and tactile texture.”

DESCRIPTION

The Fiber Side Chair is made from an innovative wood fiber composite with up to 25% pine wood fibers for a tactile expression and matte touch, joined by the Scandinavian touch of a wood base. The fibers make for a unique texture when viewed up-close yet become invisible to the eye when viewed from afar, paired with an embracing yet minimal shape.

PRODUCTION PROCESS

The wood fiber and plastic blend is injected into the mold, forming the chair’s shell.

Shell consists of a wood and plastic composition with up to 25% pine wood fibers, 70% PP (polypropylene) and 5% colored PP. Wood base is made from solid oak wood with a water-based lacquer.
